EXECUTIVE SUMMARY

Toward a Greener, Healthier, and Happier Community

A Comprehensive Master Plan for Parks, Recreation, and Open Space in Deer Park, Texas

EXECUTIVE SUMMARY

Deer Park, Texas, is a unique community that blends industrial strength with a deep sense of camaraderie. Its rich history, robust economy, and the character of its residents contribute to its welcoming atmosphere. Notably, Deer Park was one of the first cities in Texas, alongside Corpus Christi, to adopt a parkland dedication ordinance. The city's parks and recreational facilities provide numerous outdoor opportunities, significantly enhancing the quality of life for both residents and visitors.

Since the previous master plan was developed in 2013, Deer Park has undergone significant changes in population, environment, and infrastructure.

Purpose and Scope of the Master Plan

This master plan aims to outline a long-term vision, strategies, guidelines, and framework for the continuous improvement, enhancement, upgrading, development, and maintenance of Deer Park's parks and recreational facilities over the next decade (2024-2034). The scope of this comprehensive planning process includes:

- 1. Assessing existing parks and recreational facilities.
- 2. Identifying community needs and priorities concerning parks, recreation facilities, and environmental quality.
- 3. Developing a shared vision, goals, and objectives for parks, recreation facilities, and green infrastructure through community engagement.
- 4. Establishing a program for the improvement, enhancement, and development of parks and recreation facilities.
- 5. Creating a spatial master plan framework for the city-wide recreation and park system.
- 6. Developing schematic site plans for priority areas identified in the master planning process.
- 7. Formulating implementation strategies.

Process, Approach, and Focus

The master planning process was conducted in six phases over 12 months (September 2023 to August 2024):

· Phase I: Data Collection and Research

- Phase II: Visioning and Program Development
- Phase III: Master Plan Framework Development
- Phase IV: Conceptual Site Design for Target Park Sites
- Phase V: Development of Master Plan Implementation Strategies
- Phase VI: Final Documentation and Reproduction

Participatory Approach and Community Engagement

The community was actively involved through various methods, including:

- Community Needs Assessment Questionnaire Survey
- Community Engagement Workshops
- Focus Group Design Charrettes
- Bi-Weekly Core Group Meetings
- Work-in-Progress Presentations and Reviews
- Presentations to the Park Commission of Deer Park
- Presentations to the City Council of Deer Park

Emphasis and Focus

This master plan emphasizes the following aspects:

- Experience with Nature: Transitioning Deer Park from an industrial town to a nature-oriented, healthy community.
- Culture and Art Experiences: Expanding cultural and artistic opportunities for residents.
- Public Health and Wellness: Promoting an active lifestyle through improved exercise opportunities and walkability.
- Connectivity: Enhancing connections with nature, across neighborhoods, and linking historical and cultural heritage.
- Community Identity: Strengthening community identity through signage, public art, and wayfinding systems.

The goal is to make Deer Park a greener, healthier, and happier community.

Key Issues

The master plan identifies six key issues that need addressing:

- Connectivity/Accessibility: Limited sidewalks, bike lanes, parking spaces, and ADA compliance.
- Variety and Quality: Insufficient shade, aging facilities, and a lack of diverse recreational opportunities.
- Inclusivity and Equity: Insufficient park facilities in underserved neighborhoods and low utilization of the Golf Course.
- Community Identity: Lack of visual identity, wayfinding signage, and streetscape beautification.
- Sustainability: Issues such as air and noise pollution, urban heat, flood risk, and insufficient shade trees.
- Land Availability/Funding: Limited land for expansion and financial constraints.

Mission Statement:

The City of Deer Park aims to deliver exemplary municipal services that enhance the quality of life while reflecting our history, culture, and unique sense of community.

Goals & Objectives:

The master plan seeks to achieve the following five general goals:

- 1. Ensure all park systems and facilities are integral to the city.
- 2. Revitalize park infrastructure with unique features reflecting neighborhood character.
- 3. Create a vibrant cultural and arts hub within the city.
- 4. Establish city-wide connectivity.
- 5. Promote and enhance the city's unique identity.

Specific objectives are established for each goal to guide implementation.

Master Plan Framework for Parks, Recreation, and Open Space

The proposed master plan framework includes:

A. Five Theme Districts:

- 1. Cultural/Art District
- 2. Learning District
- 3. Nature District
- 4. Center District
- 5. Industrial District

B. Four Gateway Entrances:

- 1. East entrance (Pasadena Boulevard-East End)
- 2. West entrance (Pasadena Boulevard-West End)
- 3. South entrance (Center Street-South End)
- 4. North entrance (Center Street-North End)

C. Three Characteristic and Functional Corridors:

- Civic Corridor (San Augustine Street)
- 2. Commercial Corridor (Center Street)
- 3. Green Space and Drainage Corridor

D. Two Community Hubs:

- 1. Cultural/Art Hub (Theater Complex and Art Park)
- 2. Civic and Community Hub (City Hall, Community Center, and Dow Park)

E. One Interconnected Multi-level Trail System:

- 1. Primary Trail Loop (Deer Park Primary Loop)
- 2. Secondary Trail Loops (Cultural/Art Trail, Learning Trail, Nature Trail, and Center Trail)
- 3. Tertiary Trail Loops (Art Walk, Discovery Trail, Exploration Trail, Doe Meadow Trail, Deer Track Trail, and Antler Trail)

Target Parks and Schematic Site Designs

The master plan identifies 16 target parks for improvement and development:

Cultural/Art District:

- 1. Terrace Park
- 2. Avon Park
- 3. Art Park
- 4. Heritage Park
- 5. McHenry Park
- 6. San Jacinto Park

Nature District:

7. Park Green Park

- 8. Patrick Bayou
- 9. Adult Sports Complex
- 10. Park Meadows
- 11. Nedith Park
- 12. Nature Preserve

Learning District:

- 13. Deer Meadows Park
- 14. Parkview Park
- 15. Kingsdale Rec Center

Center District:

- 16. Dow Park
- 17. Dalmatian Park

Proposals for these parks include site inventory, analysis, design programs, conceptual site plans, and perspective renderings to aid in future grant applications, fundraising, and community engagement.

Implementation Strategies

Successful implementation relies on:

- 1. Effective phase development planning and strategies.
- 2. Availability of funding.
- 3. Active community engagement and public support.
- 4. Effective marketing and promotion.

A. Phase Development Strategies:

Implement the plan incrementally, prioritizing projects based on community needs and strategic goals. Focus on underserved areas, projects with easier funding prospects, and those with significant impact.

B. Project Funding Strategies:

· Apply for various grants.

- Establish partnerships and collaborations.
- Seek donations and fundraising.
- Implement user fees and rentals.

C. Community Engagement:

Engage the community through:

- Leaders and influencers.
- · Partnerships and collaborations.
- Surveys and feedback mechanisms.
- Technology.
- Events, educational programs, and volunteerism.
- · Diverse outreach efforts.

D. Branding, Marketing, Outreach, and Promotion:

Enhance awareness and participation through:

- Brand development.
- Digital marketing and data analytics.
- Content marketing.
- Community outreach events and promotions.

By integrating these strategies, Deer Park can build a vibrant, inclusive, and well-maintained park and recreation system that enhances community well-being, environmental health, and local economies.

INTRODUCTION

Introduction

The City of Deer Park, located in Harris County, Southeast Texas, was established in 1892 and is known as the "Birthplace of Texas." The city, named for its abundant deer population, experienced significant growth from the 1960s to the 1980s due to the development of the petrochemical industry. According to the 2020 U.S. Census, Deer Park had a population of 34,495.

In 2013, Deer Park adopted a comprehensive master plan (2013-2023) for its parks and recreation facilities. Over the past decade, more than 90% of the goals and objectives outlined in that plan have been successfully achieved. Currently, the city boasts 28 parks, six miles of trails, and six sports complexes.

As the current master plan approaches its conclusion in December 2023, there is a need to develop a new comprehensive master plan. This new plan will provide long-term strategies and guidelines for the continued improvement and enhancement of Deer Park's parks and recreational facilities, ensuring they better serve the community.

Purpose and Scope of the Master Plan

The purpose of the new comprehensive master plan is to establish a long-term vision, strategies, guidelines, and framework for the future development and enhancement of Deer Park's parks and recreational facilities. This plan will cover all city-owned public open spaces, parks, greenways, trails, and sports complexes. Additionally, it will help maintain the city's CAPRA accreditation from the National Recreation and Park Association (NRPA).

The scope of the comprehensive master planning process includes:

- 1. Assessing the existing parks and recreational facilities in the city.
- 2. Identifying community needs and priorities, focusing on parks, recreation facilities, and environmental quality.
- 3. Developing a shared vision, goals, and objectives for parks, recreation facilities, and green infrastructure through community engagement.
- 4. Establishing a program for the improvement, enhancement, and development of parks and recreation facilities.
- 5. Creating a spatial master plan framework for the city-wide recreation and park system.
- 6. Developing schematic site plans for priority areas identified in the master planning process.
- 7. Formulating implementation strategies and a phased plan.

Master Planning Process and Schedule

The master. planning process was carried out in five phases over 12 months, from September 2023 to August 2024:

Phase I: Data Collection and Research

Step 1: Community Needs Survey and Assessment

- Step 2: Assessment of Existing Parks and Recreational Facilities
- Step 3: Best Practice Case Studies (Precedent Studies)

Phase II: Visioning and Program Development with Community Engagement

- Step 4: Development of Vision and Mission Statements
- Step 5: Establishment of Goals, Objectives, and Guiding Principles
- Step 6: Development of a Park and Recreation Improvement Program

Phase III: Master Plan Development

- Step 7: Creation of a City-Wide Recreation and Park Master Plan Framework with Development Guidelines
- Step 8: Development of Schematic Site Plans for Target Priority Areas

Phase IV: Development of Master Plan Implementation Strategies

- Step 9: Formulation of Implementation Phasing Strategies
- Step 10: Development of Funding Strategies
- Step 11: Creation of Community Engagement Strategies
- Step 12: Development of Marketing and Promotion Strategies

Phase V: Final Documentation, Revision and Reproduction

The master planning process proceeded according to the following timeline:

Master Planning Process and Schedule (09/23-12/24)

	Yea	r 202	3						Year	2024

Community Engagement and Participation

During the master planning process, the community was actively involved through various methods, including:

- Community Needs Assessment Questionnaire Survey
- Community Engagement Workshop
- · Focus Group Design Charette
- Bi-Weekly Core Group Meetings
- Work-in-Progress Presentations and Reviews
- Presentations to the Park Commission of Deer Park
- Presentations to the City Council of Deer Park

Partnership with Texas A&M University

The development of this master plan was a collaborative effort with the Texas Target Communities Program, part of the Department of Landscape Architecture and Urban Planning at Texas A&M University. This project was conducted as a community outreach and service-learning initiative by a team of faculty members, graduate students, and undergraduate students from the landscape architecture programs. The team consisted of five faculty members, five Master of Landscape Architecture (MLA) students, and 26 Bachelor of Landscape Architecture (BLA) students, working across three different classes.

WORKSHOP

Jimmy Burke Center 500 W. 13th Street Deer Park, TX 77536

Deer Park Parks and Recreation would like to invite you to join us for the Open Space Master Plan Workshop. Help us shape the future of Deer Park Parks & Recreation.

Workshop Agenda

3:00 - 3:20 Opening and introduction

3:20 - 4:20 Breakout brainstorm session

4:20 - 4:30 Break

4:30 - 4:50 Report briefing

4:50 - 5:00 Wrap up

TEXAS TARGET COMMUNITIES

SPRING 2023

The Deer Park Parks and Recreation department sought assistance from Texas A&M University's Texas Target Communities program, aiming to enhance their sustainability initiatives. Despite Deer Park's considerable size posing initial qualification challenges, the Texas Target Communities program, in collaboration with the Texas A&M Landscape Architecture and Urban Planning Department, resolved to support the city's aspirations for sustainable development.

DEER PARK AND TAMU KICK OFF MEETING

FALL 2023 - LAND 693 SEPTEMBER 7TH, 2023

The inaugural meeting took place at Deer Park's temporary Park and Recreation building within Dow Park. It served as a platform for both teams to acquaint themselves, align on the desired scope of work for the upcoming master plan, and conduct a comprehensive tour of the facilities.

DEER PARK AND TAMU BI-WEEKLY MEETINGS

FALL 2023 AND SPRING 2024

The Deer Park Parks and Recreation
Department team and the Texas A&M
University team held biweekly meetings
via Microsoft Teams. These sessions
served as opportunities to exchange
updates, address any ongoing queries,
and ensure seamless progress in the
collaborative process.

COMMUNITY WORKSHOP

FALL 2023 - LAND 311 SEPTEMBER 27TH, 2023

The initial community workshop, led by the Texas A&M team alongside Bachelor of Landscape Architecture students, took place at the Jimmy Burke Activity Center. Residents of Deer Park were seated at tables alongside groups of students, fostering direct engagement. The session provided students with the chance to inquire about resident perspectives, gain insights into the city's dynamics, and actively receive feedback from the community.

CITY COUNCIL PRESENTATION

FALL 2023 - LAND 311/693 DECEMBER 4TH, 2023

At the conclusion of the first semester's efforts, the Texas A&M University team undertook the responsibility of delivering a presentation to the Deer Park City Council, providing updates on their progress. With a designated 10-minute slot, they elucidated their advancements in accordance with the progress schedule, master plan scale, and intricate designs for individual parks. Following the presentation, the Deer Park City Council engaged in a discussion, posing questions and addressing concerns. In response to the feedback received, Texas A&M University proceeded into the subsequent semester with renewed vigor to further enhance the master plan.

COMMUNITY SURVEY NEEDS ASSESSMENT

FALL 2023 - SPRING 2024 LEAD BY DR. DONGYIN LI

The Deer Park Parks and Recreation Community Needs Assessment Survey aimed to gather feedback on park usage, unmet needs, and future plans for community well-being. Using web and paper surveys, it reached residents through utility bills, newsletters, email Listservs, and physical copies. Structured into four sections on recreational activities, health, children's activities, and demographics, it prioritized user-friendliness with a 15-minute completion time. After cleaning, 464 valid responses informed the development of the Park, Recreation, and Open Space Plan through detailed analysis and presentation formats.

COMMUNITY FOCUS GROUPS

SPRING 2024 - LAND 621 MARCH 6TH, 2024

The second community engagement meeting involved Master of Landscape Architecture students interacting directly with Deer Park residents and facility workers. This focused group session aimed to ensure every voice was heard during discussions. Students facilitated conversations by presenting questions and prompts to participants at their tables, fostering a dynamic exchange where they could learn, gather feedback, and further explore topics through additional questioning to stimulate further discussion.

CITY WIDE PRESENTATIONS

SPRING 2024 - LAND 621/693 MAY 6TH AND 7TH, 2024

Upon the conclusion of both the first and second semesters, Texas A&M University assumed the responsibility of presenting their extensive work to both the city park commission team and the city council. The objective of these presentations was to showcase all completed endeavors over the year, providing a comprehensive overview of the contributions made by Texas A&M students and faculty. Each presentation allocated a generous 25 minutes for Texas A&M University to present their work and engage in subsequent discussions, ensuring all viewers gained a thorough understanding of the accomplished tasks and their implications for the project's progression.

COMMUNITY ENGAGEMENT ACTIVITIES

I. COMMUNITY PROFILE OF DEER PARK

1.1 LOCATION AND REGIONAL CONTEXT OF DEER PARK

PROJECT BACKGROUND

Deer Park, Texas, situated southeast of Houston within Harris County, covers an area of 14.5 square miles. Despite its relatively small size, the city is considered landlocked due to its surrounded location, hemmed in by neighboring Houston cities and the Buffalo Bayou Ship Channel to the north. The industrial district of the city is concentrated around the ship channel, while a mixed-use development lies beneath Highway 225, also known as Pasadena Freeway or Texas Independence Highway.

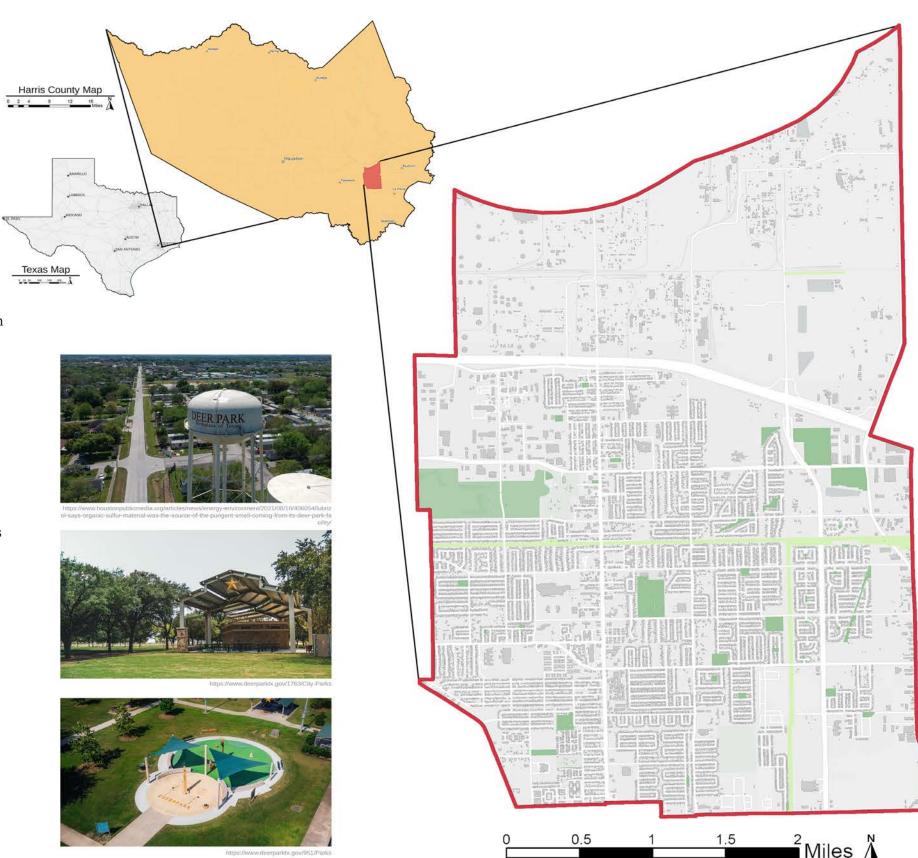

The specific area of focus for this discussion encompasses the city grounds directly under the 3.2 miles of highway frontage, totaling approximately 10 square miles of land. This site includes 30 parks of varying sizes, 6 miles of trails, and 6 sports complexes. All these recreational spaces are easily accessible by vehicle, connected through a network of primary and secondary roads that crisscross the city.

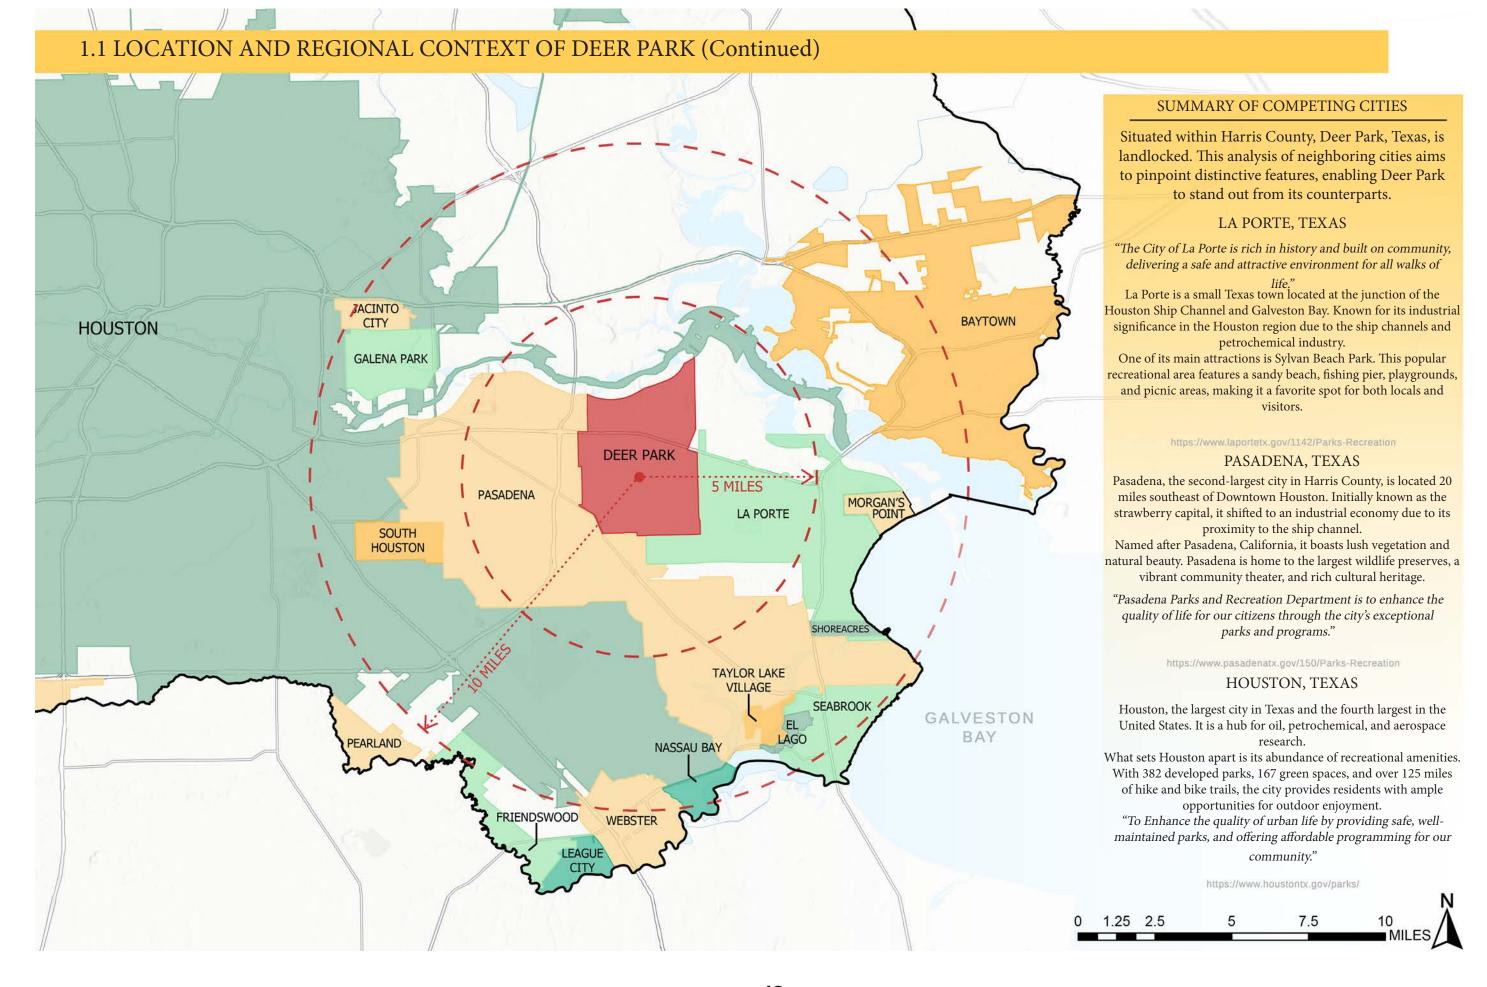

Noteworthy among these parks is Dow Park, located at the heart of Deer Park. It functions as the city's focal point, often regarded as its "downtown" area by locals and neighboring residents alike.

Deer Park boasts a diverse natural landscape, including dense forest areas, intricate water canal systems, vibrant green corridors, and expansive open grasslands. These elements collectively form the city's green space, providing residents with serene and recreational environments. The city's commitment to green spaces is evident in its existing tree canopy and major site elements.

PROJECT SCOPE

The proposed project aims to create a comprehensive master plan for Deer Park's parks and recreational facilities, spanning from 2024 to 2034. This plan encompasses all existing city-owned public spaces, parks, greenways, trails, and sports complexes. Once approved and adopted, the new master plan will serve as a guiding document, providing vision, strategies, guidelines, and a framework for the future development and enhancement of the city's recreational areas. Moreover, it plays a crucial role in maintaining the city's accreditation as a CAPRA (Commission for Accreditation of Park and Recreation Agencies) accredited park and recreation agency recognized by the National Recreation and Park Association (NRPA).

2022

1.3 DEMOGRAPHICS OF DEER PARK

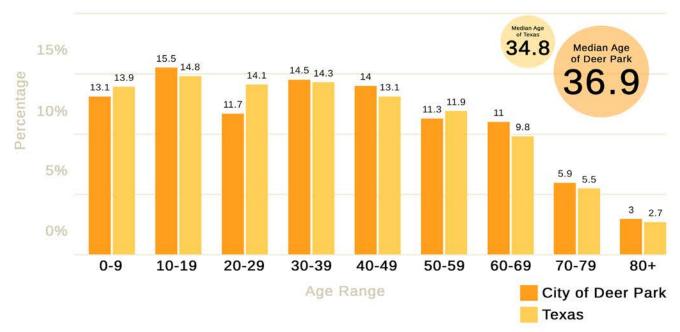

DEER PARK POPULATION PREDICTION

Deer Park experienced consistent population growth from 1960 to 2020, reaching a population of 32,381 in 2023. However, recent data indicates a decline, with the city currently experiencing an annual decrease of -1.94%. This decline has led to a -5.71% decrease in population since the last census in 2020, which recorded a population of 34,343.

DEER PARK, TEXAS VS. TEXAS AGE ANALYSIS

Deer Park has a substantial proportion of youth and middle-aged adults, but it stands out in Texas due to its higher percentage of seniors. With a median age of 36.9, the community primarily consists of starter families and older family units.

HARRIS COUNTY RACE/ETHNICITY ANALYSIS

From its foundation, Deer Park was primarily a white community. However, recent developments have seen a significant increase in the Hispanic/Latino population.

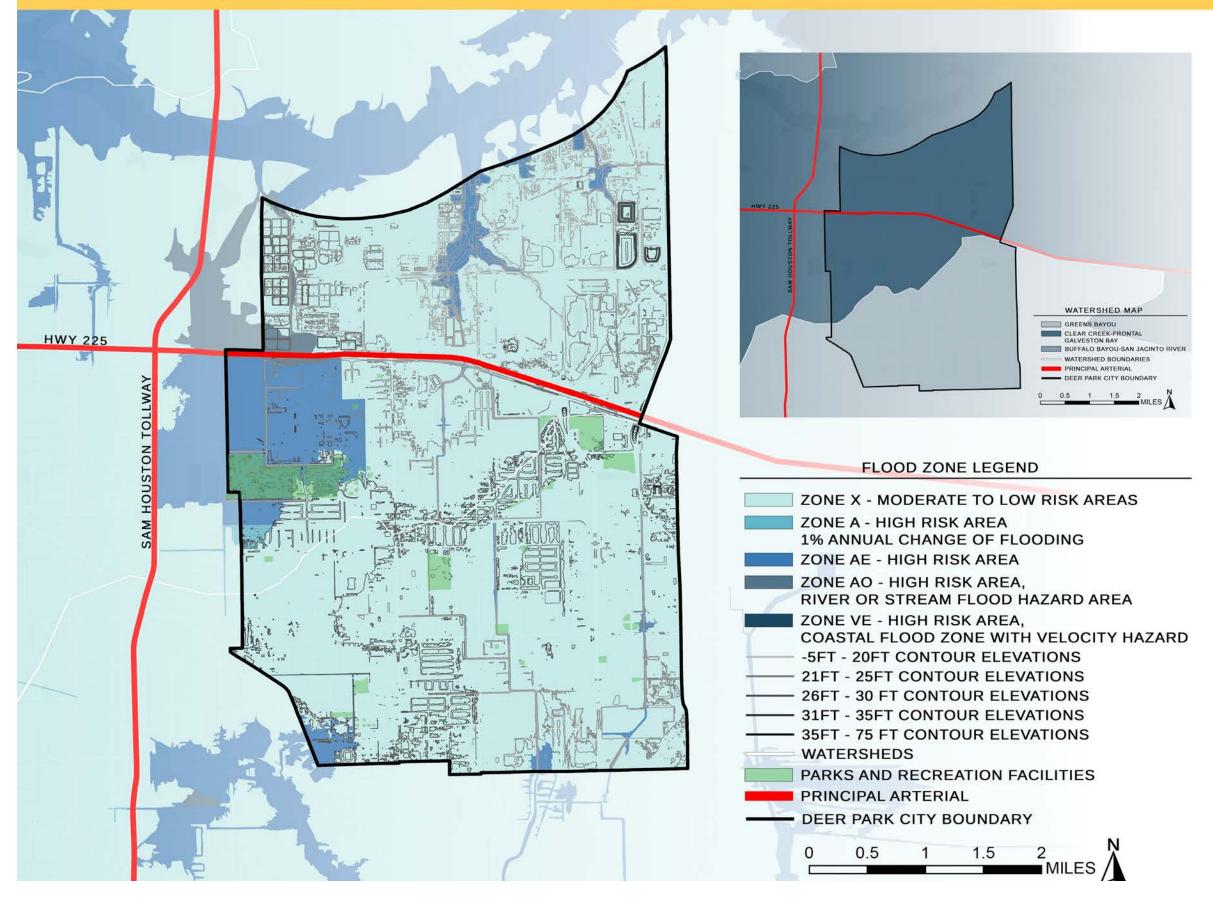

Race/Ethnicity (% of Total Population)	City of La Porte	City of Pasadena	City of Houston	City of Deer Park
White	49.2%	23.9%	25.1%	54%
Black or African American	7.2%	2.9%	22.4%	2.2%
American Indian / Alaska Native	2.2%	1.1%	0.7%	1.2%
Asian	1.4%	1.7%	6.9%	1.0%
Native Hawaiian	0%	0%	0.1%	0%
Hispanic or Latino	40%	70.4%	44.8%	41.6%

HARRIS COUNTY ECONOMICS ANALYSIS

Deer Park stands out favorably in economic comparisons with neighboring cities. It boasts the highest median income values and the lowest poverty rates, indicating a strong economic standing within the community.

Economic Characteristics	City of La Porte	City of Pasadena	City of Houston	City of Deer Park
Median Income Value	\$78,665	\$61,182	\$56,019	\$81,558
Per Capita Income	\$40,935	\$25,381	\$35,578	\$35,093
Population>16 Years Old in Labor Force	64.6%	67%	66.8%	64.5%
Persons in Poverty	10.7%	17.9%	19.5%	8.1%
Median Home Value	\$165,800	\$142,900	\$200,700	\$190,800

1.4 PHYSICAL ENVIRNMENT OF DEER PARK - FLOOD RISK ZONES

POTENTIAL FLOODING

Deer Park faces potential flooding risks due to its proximity to the Buffalo Bayou channel and Galveston Bay. The majority of the city, classified as Zone X, has a moderate to low risk for flooding, including most parks and recreation facilities. However, high-risk areas (Zone AE) are situated along the city's boundary near the golf course and the southwestern corner.

To mitigate flooding, Deer Park has implemented an extensive drainage canal system throughout the city. These canals allow rapid water movement during large surge events and provide a means to redirect water away from vulnerable areas, ensuring the city is prepared to manage potential flooding challenges effectively.

FLOOD FACTOR DATA

FLOOD RISK OVERVIEW MODERATE

3,723 OUT OF 10,062 HOMES AT MODERATE RISK

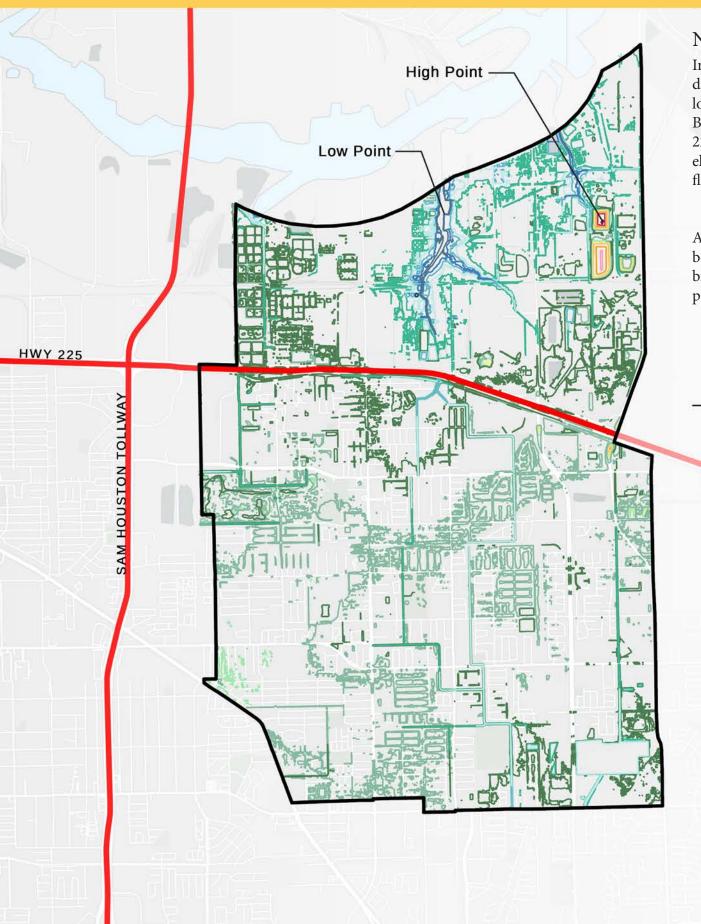

195 OUT OF 502 COMMERCIAL PROPERTIES AT MODERATE RISK

155 OUT OF 189 MILES OF ROAD AT MAJOR RISK

https://riskfactor.com/city/deer-park-tx/4819624_fsid/flood

1.4 PHYSICAL ENVIRONMENT OF DEER PARK -- TOPOGRAPHY AND SURFACE DRAINAGE

NAVIGATING THE WATER FLOW

In the northern part of Deer Park, within the industrial district, lies both the city's lowest and highest points. The lowest point occurs where Deer Park meets the Buffalo Bayou channel above Highway 225. South of Highway 225, the majority of the land maintains a consistent elevation of 30 feet, indicating the city's predominantly flat terrain.

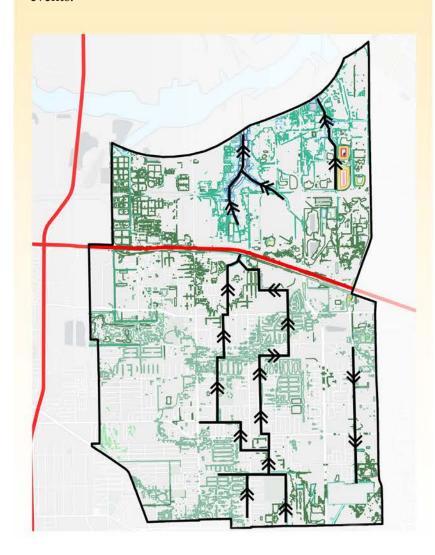

Across Deer Park, a network of drainage canals can be observed, ranging from concrete buffers to green bioswales, all leading to drainage detention or retention ponds.

CONTOUR LEGEND

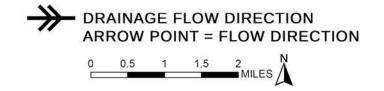

- -5 FT - 0 FT 5 FT 10 FT 15 FT 20 FT - 25 FT 30 FT 35 FT 40 FT 45 FT 50 FT 55 FT 60 FT - 65 FT - 70 FT - 75 FT PRINCIPAL ARTERIAL DEER PARK CITY BOUNDARY

DIRECTION FLOW OF WATER

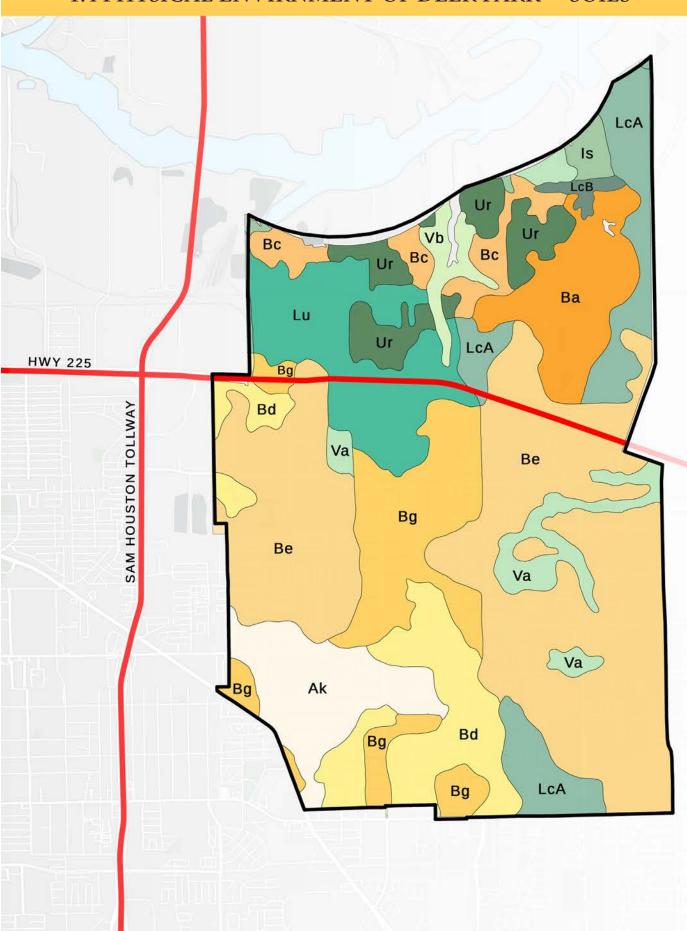

Existing drainage canals are marked by black lines, with arrows indicating the direction of water flow. The central canals transport water from South to North, channeling it towards the Buffalo Bayou channel. Meanwhile, the canals on the right direct water from North to South, ultimately guiding it to a drainage pond. This comprehensive drainage system plays a vital role in managing water flow and ensuring the city's resilience against potential flooding events.

DRAINAGE LEGEND

1.4 PHYSICAL ENVIRNMENT OF DEER PARK -- SOILS

SOIL COMPOSITION

Examining the region south of Highway 225, Deer Park's soil composition includes the Bernard, Addick's, Lake Charles, and Verland Series. The dominant soil type in the southern area is the Bernard-Urban Land Complex, characterized as slow-draining with a high runoff rate. Ideal vegetation for the Bernard soil type includes tall prairie grasses and Elm Trees. The Verland Series, although a minor part of Deer Park, also exhibits slow permeability and high runoff characteristics.

Both Addicks and the Lake Charles Series are moderately well-draining soils with moderate to high runoff rates. In essence, all soil types in Deer Park are high runoff varieties. This information is crucial to consider for future park and recreational facility expansions and renovations, ensuring thoughtful planning and effective water management strategies.

TEXAS ECOREGION

Soils are acidic sands and sandy loams, with clays occurring primarily in the river bottoms. Native vegetation consists of tallgrass prairies and live oak woodlands.

1.5 EXISTING LAND USE OF DEER PARK

THE URBAN LANDSCAPE

In the early stages of Deer Park's development, the industrial district took precedence as one of the city's initial sectors. Progressing from north to south along Center Street, the industrial area closely aligns with the highway, a departure from the norm where general commercial zones usually greet visitors upon entering a city. North of Highway 225 predominantly hosts the industrial district, while south of the highway, the city's landscape transforms into a mix of commercial establishments, residential areas, civic spaces, and recreational facilities.

Center Street, functioning as the city's primary thoroughfare, serves as the main hub for general commercial activities. Although Deer Park lacks a traditional downtown area, Center Street effectively functions as its main street, incorporating beautification initiatives and green spaces into its design. In the southeast, new additions include HEB and franchised restaurants, showcasing Deer Park's evolving urban development.

PRIVATE VS. PUBLIC

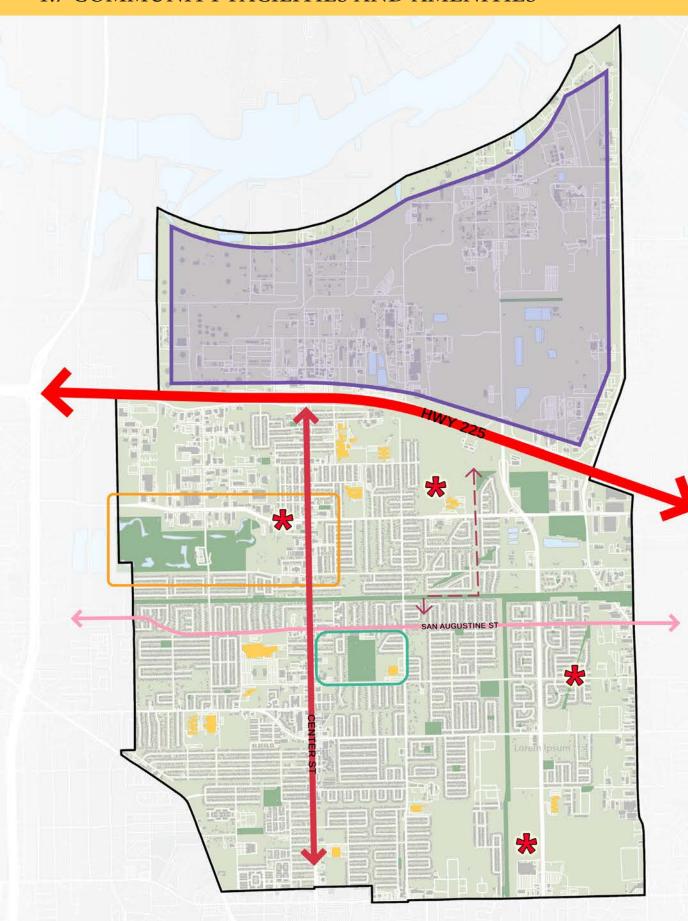

Deer Park is strategically positioned adjacent to two vital transportation arteries: Highway 225 and the Sam Houston Tollroad. Highway 225, cutting directly through the city, acts as a clear boundary, separating the industrial sector from the rest of the city.

The city's primary north-south thoroughfares are Center Street and East Boulevard, with Center Street serving as the bustling main street housing a majority of the general commercial businesses. For east-west travel, the key routes are 13th Street and Pasadena Boulevard. Additionally, San Augustine Street plays a significant role, serving as the central road through the Parks and Recreation hub, akin to the main street for the Parks and Recreation department.

Remarkably, Deer Park residents enjoy shorter commute times than the national average, with most individuals predominantly using their personal vehicles for travel.

1.7 COMMUNITY FACILITIES AND AMENITIES

COMPREHENSIVE OVERVIEW OF THE UNIQUE URBAN LANDSCAPE

Deer Park, currently divided by Highway 225, features an industrial district to the north and a vibrant southern section comprising residential homes, commercial businesses, and essential parks and recreation facilities.

Unlike typical cities, Deer Park lacks a traditional 'downtown,' but the renowned Dow Park serves as its central hub, housing the city hall, community center, and aquatics facilities. Widely used by the community, Dow Park's strategic location and diverse programming make it a cherished space.

The city is particularly enthusiastic about enhancing pedestrian connectivity on a citywide scale, a central focus in the forthcoming 2024-2034 master plan.

THEATER ARTS PROGRAM

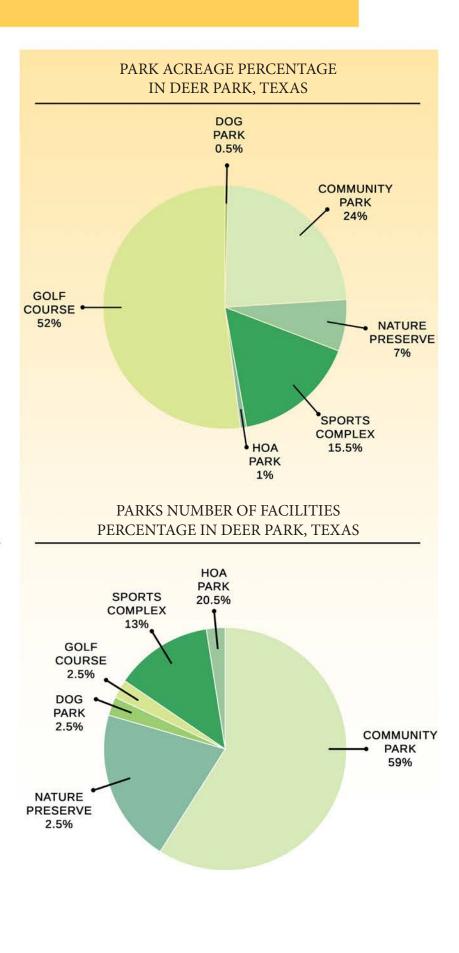

Since 1979, the Art Park Players have been one of Deer Park's most vibrant community initiatives, bringing the joy of live theater to life with over 10 productions each year. What started as a small effort in theater education, with only six students, has now blossomed into a thriving program, the Jr. Art Park Players, which nurtures the talents of more than 250 young performers annually. This beloved program has become a creative hub, engaging the entire community and enriching Deer Park's cultural landscape by fostering artistic expression and unity through its productions.

II. INVENTORY AND EVALUATION OF EXISTING PARK & RECREATION FACILITIES

2.1 GUIDE TO DEER PARK'S EXISTING PARKS AND RECREATION

Note: Deer Park has acquired Ivy Oaks Park, which is 0.5 acres in size, including the following facilities: 2-5 playground structure, 1 spinner, 1 two-bay swing sets, 2 picnic shades with tables, 4 pieces of fitness equipment, 1 basketball court, and 1 trash can.

Evolution of Parkland Dedication Ordinances in Texas

2—11
Evolution of ordinances

To determine the status of parkland dedication ordinances in Texas, a survey was sent to all municipalities in Texas that were known to have public park amenities. Of the 117 cities contacted, 83 responded and 48 of those reported that they had parkland dedication ordinances. Copies of those ordinances can be viewed at www.rpts.tamu.edu/landdedication. The content of those 48 ordinances serves as the basis for this report.

The 83 cities that responded are listed in Table 1. Although some of these cities did not have parkland dedication ordinances, all did report their total parkland acreages. Most of the population data were provided by the cities' park and recreation directors who responded to the survey. In the few instances where these data were not given, Census Bureau estimates of population were used. Table 1 shows the standard of park provision in acres per 1,000 population for these 83 cities.

Table 1. Acres of parkland per 1,000 population in 83 Texas cities.

City	Population	Total park acreage	Acres/1,000 residents
The Colony	36,000	1,925.00	53.47

2.4 SWOT ANALYSIS

STRENGTHS

Community Bond

- Strong community bond fostering city pride
- Strong relationship and pride between the industrial district and the city

Parks and Recreation

- · Regularly used facilities
- Ongoing innovative renovations City Hall,
 Community Center, and Parks and Rec Hub
- Nature Preserve process natural recreational space
- Dow Park functioning as a vibrant town center
- Excellent marketing and programming initiative to promote community engagement

Rich Historical Heritage

Birthplace of Texas

Flood Mitigation

· Effective flooding infrastructure

Theater Department

Offers community involvement from young children to senior adults

OPPORTUNITIES

Parks and Recreation Enhancements

- Expansion of hike/bike trails along right ways and along drainage corridors
- Addition of shade trees to walking trails, parks, and open spaces
- Renovations of existing park facilities -Kingsdale, Terrace, and Brownwind
- · Creation of interactive parks for all ages

City Wide Infrastructure

- Wayfinding signage improvement building upon existing infrastructure
- Beautification of Center Street

Community Initiatives

- Establishment of a community gardens
- Promotion of active living through recreation programs geared toward adults

Deer Park ISD Relationship

 Support and enhance the educational programs and initiatives with neighboring schools

WEAKNESSES

Limited Expansion Opportunities

 Landlocked - restricted possibilities for expansion

Parking Challenges

• Insufficient parking facilities for parks

Accessibility Concerns

- Not all parks meet ADA standards
- Lack of inclusive accessibility features in Parks and Recreation facilities

Absence of Central Community Space

• Downtown Strip or Community Plaza

Underutilized Recreational Resources

 Golf Course usage limited - not heavily utilized by a diverse range of residents

THREATS

Industrial District

- Man-made environment
- Aesthetic quality

Traffic Congestion and Noise Pollution

- Highway 225
- Sam Houston Tollway

Natural Disaster Vulnerability

• Exposure to hurricanes, floods, and tornadoes

Public Transit

No available public transportation within the city limits

III. COMMUNITY PARK AND RECREATION NEEDS ASSESSMENT

3.1 COMMUNITY PARK AND RECREATION NEEDS ASSESSMENT -SURVEY METHOD

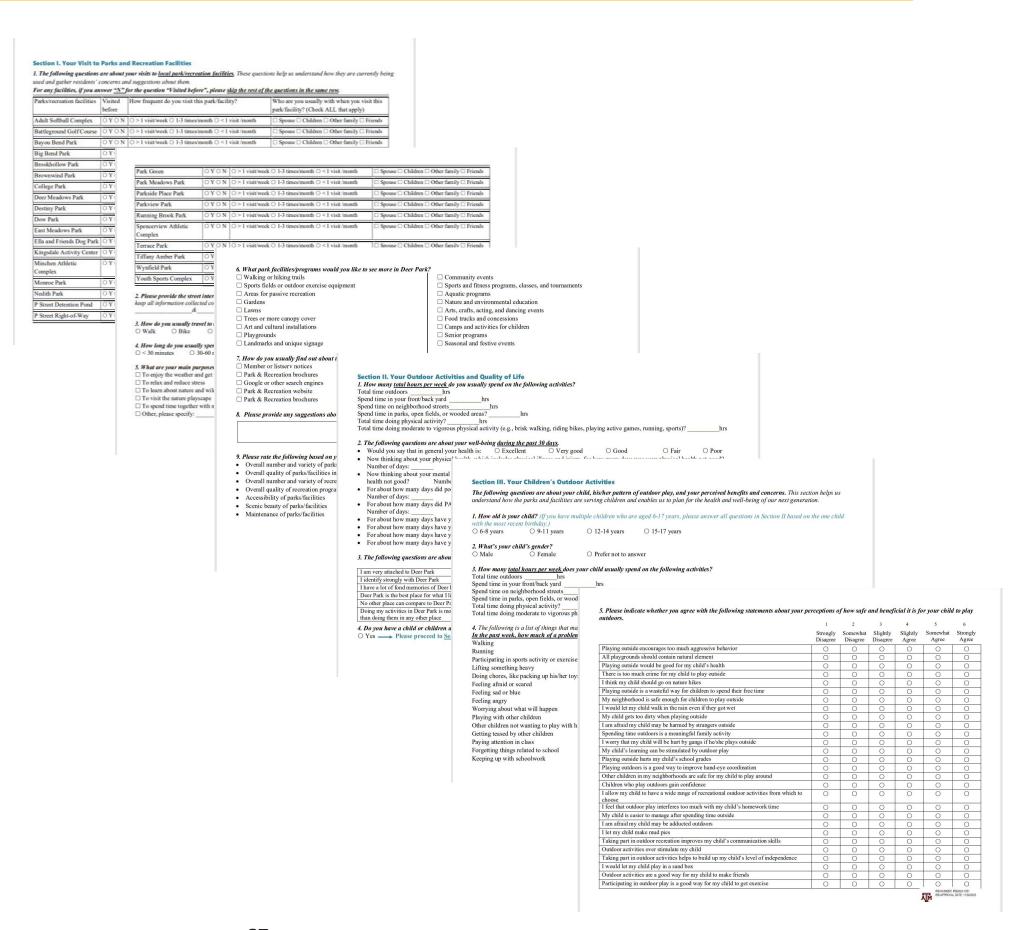

SURVEY METHOD

The Parks and Recreation Community Needs Assessment Survey was designed to gather community feedback and evaluate the use patterns, unmet needs, and future park and facility plans to promote health and well-being. Survey mode included both web and paper surveys. The survey frame encompassed all adult residents with a valid address in the City of Deer Park. The survey link and QR code were widely distributed through city utility bills, and the Parks and Recreation Department newsletters and email Listserv. Additionally, to ensure inclusivity and cater to those who prefer physical questionnaires, paper copies of the survey were distributed within the community with return postage paid.

The survey was structured into four sections, each designed to capture essential information on different aspects. These sections included questions on the usage patterns of parks and recreational facilities, the types of outdoor activities residents engage in and their health conditions, children's recreational activities and parents' perceptions and concerns, and a variety of sociodemographic factors. Designed to be user-friendly, the entire survey could be completed in approximately 15 minutes.

Upon closing the survey, a robust number of responses were collected. The data underwent a rigorous cleaning process to remove any entries from web bots, duplicate submissions, and incomplete responses. After this thorough filtration, a total of 464 valid responses remained, all from residents of Deer Park.

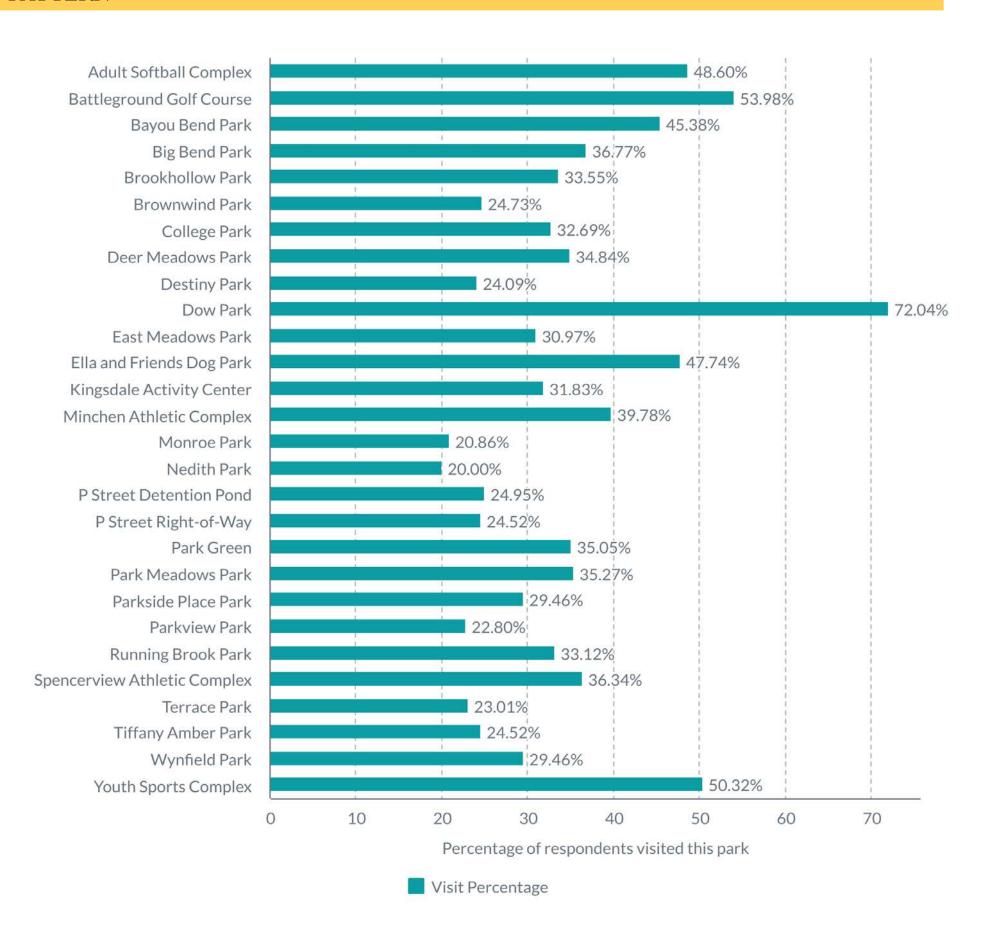

The analysis of these responses was comprehensive, with results compiled in tabular format and presented visually with infographics. The results were used in the development of Park, Recreation, and Open Space Plan.

3.2 SURVEY RESULTS - PARK VISITATION PATTERN

WHICH PARKS/FACILITIES HAVE YOU VISITED?

On average, each park/facility has been visited by 34.5% of the residents. The top visited parks are Dow Park, Battleground Golf Course, and Youth Sports Complex. Smaller neighborhood parks are relatively less visited compared to city-level park and sports complexes.

3.2 SURVEY RESULTS - PARK VISITATION PATTERN (Continued)

HOW OFTEN DO YOU VISIT THE PARKS/FACILITIES AND WHO ARE YOU WITH?

For Dow Park, while some visitors go to parks only occasionally, around one-third are frequent visitors.

While visiting with spouse or children are popular for parks, the Battleground Golf Course, Softball Complex, and Kingsdale Activity Center accommodate visits with friends.

NAMES OF PARKS AND FACILITIES

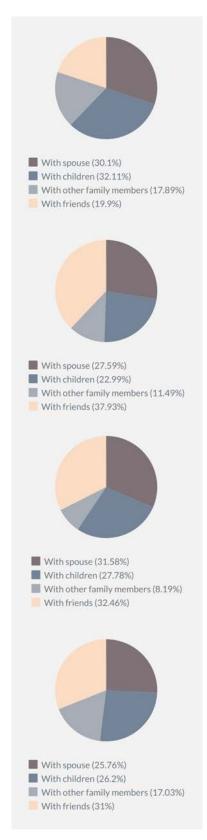

HOW OFTEN DO YOU VISIT THE PARKS/FACILITIES?

WHO DO YOU VISIT THE PARKS/FACILITIES WITH?

3.2 SURVEY RESULTS - PARK VISITATION PATTERN (Continued)

HOW OFTEN DO YOU VISIT THE PARKS/FACILITIES AND WHO ARE YOU WITH?

The four neighborhood parks exhibit similar visit patterns: most residents report visiting them once per month or less, and the majority of visits are accompanied by children or spouses.

NAMES OF PARKS AND FACILITIES

DEER MEADOWS PARK

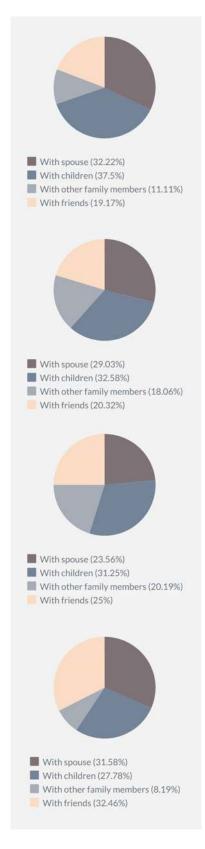

PARK MEADOWS PARK

HOW OFTEN DO YOU VISIT THE PARKS/FACILITIES?

WHO DO YOU VISIT THE PARKS/FACILITIES WITH?

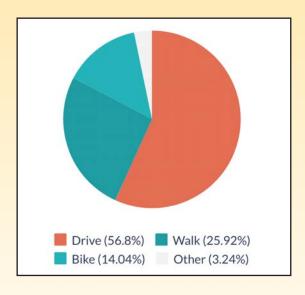

3.2 SURVEY RESULTS- PARK VISITATION PATTERN (Continued)

HOW DO YOU USUALLY TRAVEL

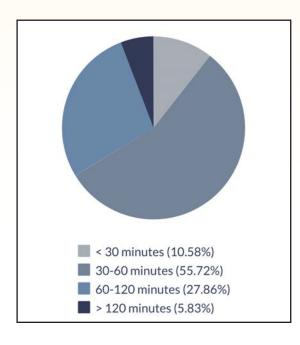

TO THESE PARK/FACILITIES?

The majority of residents drive and a quarter of them walk to the parks and facilities. A small number of them bike, run, or use other means of transportation.

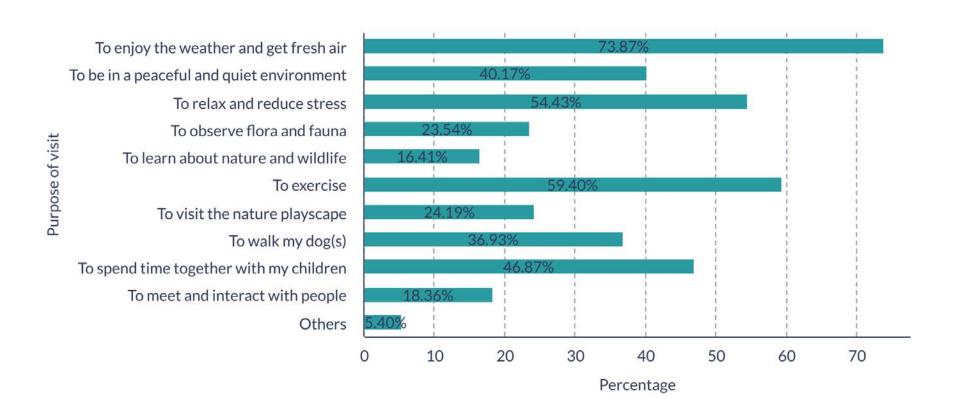

HOW LONG DO YOU USUALLY SPEND IN THESE PARKS/FACILITIES?

The majority of residents spend 30 to 60 minutes in parks or recreational facilities, followed by 60 to 120 minutes and less than 30 minutes.

WHAT ARE YOUR MAIN PURPOSES OF VISITS?

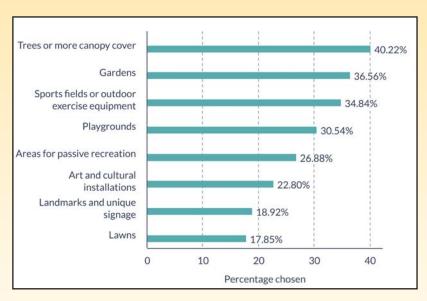

Residents are motivated to visit these parks and facilities to enjoy fresh air, exercise, and relax and reduce stress. Other frequently selected purposes are spending time in a peaceful environment, spending time with children, and walking dog(s).

3.2 SURVEY RESULTS - SATISFACTION AND DEMANDS IN PARKS AND RECREATION

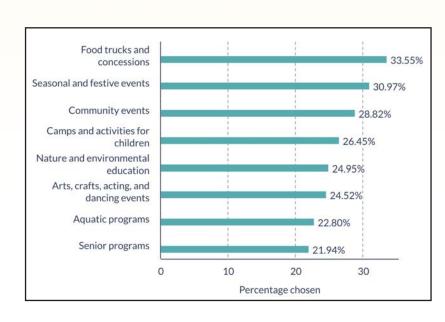

WHAT FACILITIES OR PROGRAMS WOULD YOU LIKE TO SEE MORE?

Trees and more canopy cover appeared as the top desired feature, followed by gardens, sports equipment, and playgrounds.

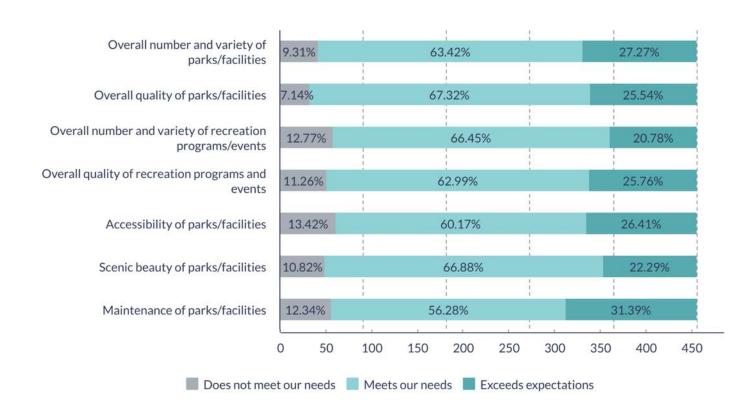

WHAT FACILITIES OR PROGRAMS WOULD YOU LIKE TO SEE MORE?

Regarding programs, residents would like more food trucks, seasonal events, community events, and camps for children.

WHAT'S YOUR OVERALL ASSESSMENT OF THE QUANTITY, QUALITY, ACCESSIBILITY, BEAUTY, AND MAINTENANCE OF DEER PARK'S PARKS AND FACILITIES?

Residents' gave very high ratings to all questions. More than 90% report the quantity and quality of parks/facilities meet or exceed their expectations. More than 85% were satisfied with the number and variety of programs and events. Ratings for the accessibility, scenic beauty, and maintenance were consistently high.

3.2 SURVEY RESULTS - SATISFACTION AND DEMANDS IN PARKS AND RECREATION (Continued)

WHAT SUGGESTIONS DO YOU HAVE FOR FUTURE PARK AND RECREATION PROGRAM?

COMMON THEMES:

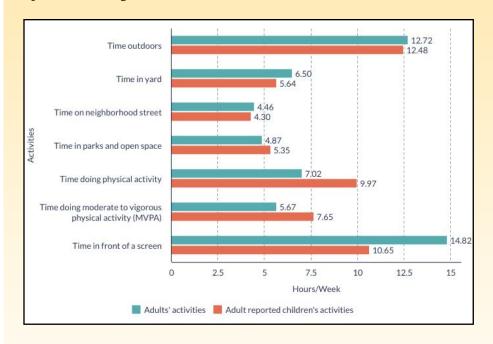

- Nature walks and sustainability education
- More trees and green space
- Programs that involve technology
- Inclusive programs for people with disabilities and a variety of ages
- Parent-child activities
- Community and cultural events
- Recreation, walking, and outdoor exercise facilities/ equipment
- Meditation and mental health related programs Various camps and classes
- Covered activity space, restrooms, and parking spaces

3.2 SURVEY RESULTS- ADULTS AND CHILDREN'S OUTDOOR ACTIVITIES AND HEALTH

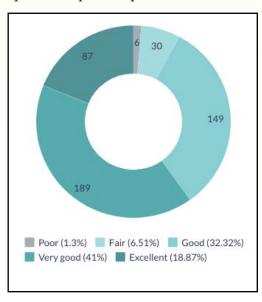

HOW MANY HOURS DID YOU SPEND ON PHYSICAL ACTIVITIES VS. SCREENS?

Residents reported spending approximately 13 hours per week outdoors, six hours conducting moderate to vigorous physical activity, and 15 hours of screen time. Parents reported that their children spend an average of 12 hours outdoors and 11 hours of screen time.

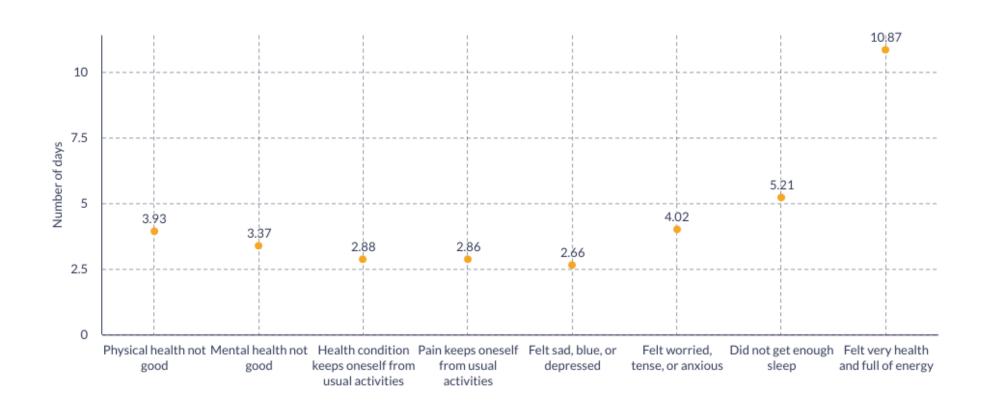

WHAT IS YOUR OVERALL HEALTH?

The majority of respondents reported "good" to "very good" overall health. Only one percent reported "poor" health.

HOW MAN DAYS DID YOU EXPERIENCE THE FOLLOWING CONDITIONS?

On average, respondents reported good physical health and mental health, demonstrated by very few average days of physical or mental health issues. For example, the average number of days when one's mental health was not good was approximately 3 out of 30.

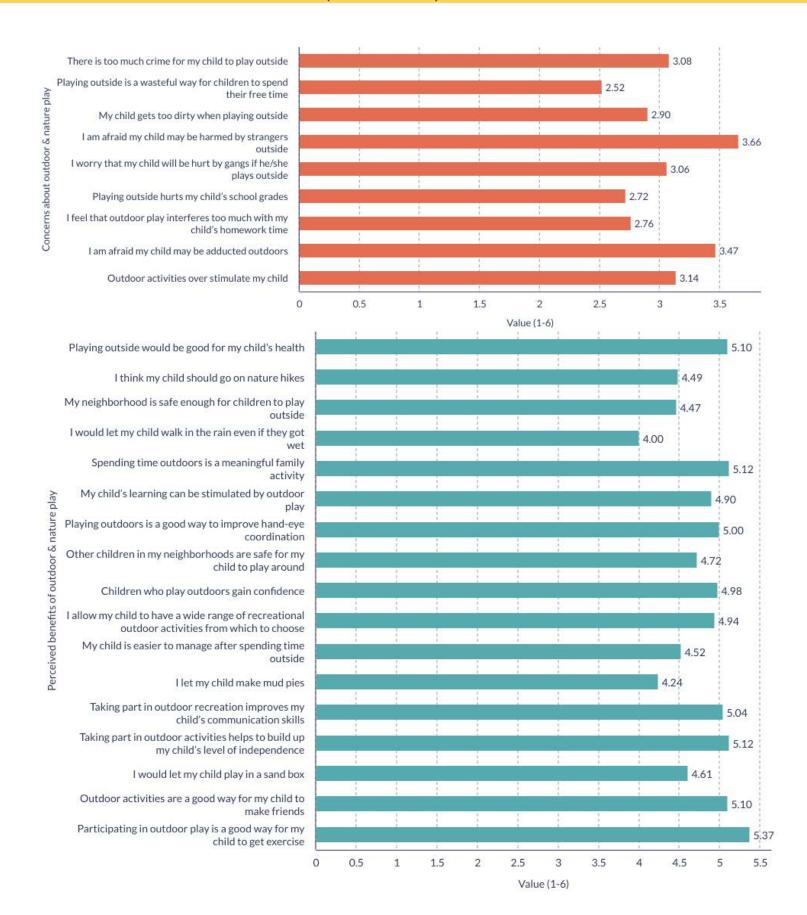

3.2 SURVEY - ADULTS AND CHILDREN'S OUTDOOR ACTIVITIES AND HEALTH (Continued)

HOW DO PARENTS PERCEIVE THE SAFETY AND BENEFITS OF CHILDREN'S OUTDOOR AND NATURE PLAY?

Parents rated the following statement on a 6 point scale, with 1 representing strongly disagree and 6 representing strongly agree. Parents have some concerns related to personal safety of children when playing outdoors.

Regarding benefits, most parents recognize the benefits of outdoor play on children's health, learning, confidence, communications, independence and social skills, as well as contributing to family bonding.

SURVEY RESULTS

The survey revealed high usage rates of the parks and facilities in the City of Deer Park. Facilities such as Dow Park, the Youth Sports Complex, and the Battleground Golf Course were visited by more than half of the users. Over 75% of the survey participants were young and middle aged adults, but they frequently visit facilities with children, spouses, or friends. Most users accessed the parks by driving, followed by walking and biking. It is common for visitors to stay for 30-60 minutes during their visits. Residents are motivated to visit these parks and facilities to enjoy fresh air, exercise, relax, and reduce stress. Other frequently selected reasons include spending time in a peaceful environment, spending time with children, and walking their dogs.

Overall, the residents expressed high approval levels of the current parks and facilities. Residents gave very high ratings to questions related to the quantity and quality of parks in the city. More than 90% reported that the quantity and quality of parks and facilities meet or exceed their expectations. Over 85% were satisfied with the number and variety of programs and events. Ratings for accessibility, scenic beauty, and maintenance were consistently high. Suggestions for future park and recreation programs included more events and programs, additional natural features, continued development of age- and abilityinclusive facilities and programs, and ongoing improvements to park amenities and maintenance. Residents generally reported healthy levels of outdoor physical activity and good mental health. Regarding children's outdoor activities, parents expressed mostly positive views. For example, most parents recognized the benefits of outdoor play for children's health, learning, confidence, communication, independence, and social skills, as well as its contribution to family bonding. However, some parents expressed concerns about the personal safety of children when playing outdoors.

KEY RECOMMENDATIONS

- 1. Continue to provide diverse programs such as recreational, cultural, educational and health promoting opportunities.
- 2. Emphasize trees and green space, and incorporate sustainable development practices.
- 3. Age-inclusive programs that not only focus on children and older adults' activities but could serve all age groups and abilities, such as adults, toddlers, and teenagers.
- 4. Integrate family based on parent-child activities
- 5. Invest in adding and maintaining amenities such as shading structures, seating and parking

IV. CORE VALUE, MISSION, GOALS AND OBJECTIVES

4.1 CORE VALUE AND PRIORTIES OF PREVIOUS MASTER PLAN

DEER PARK CURRENT MISSION STATEMENT

The Parks and Recreation Department is dedicated to providing exemplary quality-of-life services and experiences to the community consistent with our history, culture, and unique character.

DEER PARK CORE VALUES

COMMUNITY

We embrace the uniqueness of the City of Deer Park and incorporate that in advancing the health and well-being of our customers and residents through parks and recreation opportunities.

EQUITY AND INCLUSION

We endeavor to increase accessibility and inclusivity of parks, facilities, programs, and services for all citizens.

HEALTHY LIFESTYLE

We inspire our citizens to pursue healthier lifestyles, which will create a more livable community.

SAFETY

We strive to provide well-maintained and safe parks and facilities to all citizens.

STEWARDSHIP

We develop and empower our employees to serve the community to increase the relevancy and value of department facilities, programs, and services.

PRIORITY PROJECTS ON PREVIOUS PLAN

ABOUT DEER PARK PARKS AND RECREATION

The City of Deer Park was Incorporated in 1948

City of Deer Park's Park and Recreation Department was developed in the 1960s

The goal of the Parks and Recreation department is to ensure a high quality of life for patrons through our commitment to superior public spaces and enriching recreation activities. Deer Park's Park and Recreation is dedicated to providing an exemplary quality of life by offering innovative Park and Recreational experience to the community consistent with out history, culture, and unique character.

First master plan documentation was created for 2013-2023.

Over 90% of the 2013-2023 master plan has been implemented within the city.

http://www.ci.deer-park.tx.us/DocumentCenter/View/8288/121-Master-Plan?bidld=

PROPOSED MISSION STATEMENT

The Mission of the City of Deer Park is to deliver exemplary municipal services that provide a high quality of life consistent with our history, culture, and unique sense of community.

GOAL 1 Ensure all park systems and facilities are an essential part of the city.

OBJECTIVES

O1.1: Improve, maintain, and update the existing park and recreational facilities with an open space master plan that aligns with the communities needs and expectations for the next 5 to 10 years.

O1.2: Implement pedestrian friendly infrastructure, such as widened sidewalks, pedestrian zones, and bike lanes, to encourage community interaction.

O1.3: Inform people of surroundings with the use of implementations of wayfinding and signage within the park systems.

GOAL 2 Revitalize Park infrastructure with unique features for each neighborhoods character.

OBJECTIVES

O2.1: Upgrade and modernize current facilities to align with contemporary park and recreational standards and cater to evolving programming needs.

O2.2: Provide a diverse range of recreational amenities and activities tailored to the unique interests of each neighborhood, encouraging active engagement among residents of all ages.

O2.3: Integrate unique features into each neighborhood park depending on their character, history, and cultural elements.

GOALS AND OBJECTIVES

GOAL 3 Create a vibrant cultural and arts hub within the city limits.

OBJECTIVES

O3.1: Ensure the cultural and arts center is accessible to people of all abilities.

O3.2: Establish a purpose-built cultural and arts facility, equipped with state-of-the-art amenities, exhibition spaces, theaters, and studios to accommodate various forms of artistic expression.

O3.3: Continue to curate a diverse range of cultural and arts programs to cater to different interests and age groups.

GOAL 4 Establish city wide connectivity.

OBJECTIVES

O4.1: Create well-maintained pedestrian walkways and bicycle paths throughout the city, promoting eco friendly and healthy modes of transportation.

O4.2: Implement safety measures such as well-lit pathways, designated pedestrian crossings, and traffic calming techniques to enhance the safety of pedestrians.

O4.3: Implement clear and intuitive wayfinding signage systems throughout the city, enhancing navigation, promoting accessibility, and fostering a more connected and efficient urban experience.

GOAL 5 Promote and enhance the unique identity of the city.

OBJECTIVES

O5.1: Install public art installations, sculptures, and landmarks that represent the city's heritage, creating visual focal points and enhancing the cityscape.

O5.2: Create themed districts within the city, cultural or arts, to showcase specific aspects of the city's identity, attracting both residents and tourists.

O5.3: Establish iconic gateways North to South and East to West into Deer Park to establish placement.

4.3 OVERVIEW OF KEY ISSUES, MISSION, CORE VALUES, AND GOALS

KEY ISSUES

1. CONNECTIVITY CHALLENGES

- Limited Sidewalk and Bike Lanes
- Accessibility Issues
- ADA Standard

2. VARIETY AND QUALITY OF EXISTING PARK AND RECREATION FACILITIES

- Insufficient Infrastructure
- Lack of Diverse Recreation Opportunities within City Parks for Special Needs of Each Group.
- Lack of Focus on Cultural and Historical Experiences.
- Shade Insufficiency

3. INCLUSIVITY AND EQUITY

- Lack of Park Facilities in the Undeserved Neighborhoods.
- Lack of use of the Golf Course.

4. COMMUNITY IDENTITY

- Lack of Visual Identity
- Lack of Wayfinding Signage System
- Lack of Beautification Efforts

5. SUSTAINABILITY CONCERNS

- Air Pollution
- Noise Pollution
- Visual Impact
- Flood Risk Zones
- Natural Disasters
- Urban Heat Index

6. LAND AVAILABILITY

- Limited Available Land for Existing Park
- Expansion or Adding New Parks because of Landlocked Conditions.
- Financial Constraints

PROPOSED MISSION STATEMENT

The Mission of the City of Deer Park is to deliver exemplary municipal services that provide a high quality of life consistent with our history, culture, and unique sense of community.

DEER PARK CORE VALUES

COMMUNITY

We embrace the uniqueness of the City of Deer Park and incorporate that in advancing the health and well-being of our customers and residents through parks and recreation opportunities.

EQUITY AND INCLUSION

We endeavor to increase accessibility and inclusivity of parks, facilities, programs, and services for all citizens.

HEALTHY LIFESTYLE

We inspire our citizens to pursue healthier lifestyles, which will create a more livable community.

SAFETY

We strive to provide well-maintained and safe parks and facilities to all citizens.

SUSTAINABILITY

The city prioritizes sustainability through strategic urban planning, renewable energy adoption, waste reduction initiatives, and the promotion of green transportation, fostering a resilient and environmentally conscious community.

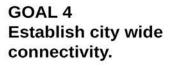

PROPOSED GOALS FOR MASTER PLAN

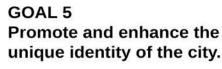

GOAL 3

Create a vibrant cultural and arts hub within the city limits.

CITY LEGIBILITY

Kevin Lynch's concept of city legibility, as presented in his influential work "The Image of the City," refers to the ease with which individuals can navigate and comprehend urban environments. Lynch argued that legible cities possess distinct landmarks, clear pathways, and recognizable nodes that contribute to a cohesive mental map for residents. This idea underscores the importance of urban design in creating cities that are not only physically navigable but also psychologically accessible, enhancing the overall quality of life for their inhabitants.

5.2 GREEN SPACE NETWORK AND PRIORITY AREAS FOR NEW PARKS

INTERCONNECTIVITY OF GREEN SPACE

The green space network in Deer Park is thoughtfully organized into six distinct categories, encompassing city-owned land, easements, and privately owned land. Notably, a substantial portion of privately owned land is concentrated in the Industrial District, situated north of Highway 225, while the remaining five categories of open green space are located south of the highway.

Before implementing any enhancements to parks and recreational open spaces, a thorough analysis of the existing green network's interconnectivity is crucial. While the map reflects an equitable distribution of parks and recreational facilities across the city, the challenge lies in the uneven distribution of green space acreage. Addressing this issue is paramount to cultivating a more balanced and accessible green infrastructure throughout Deer Park.

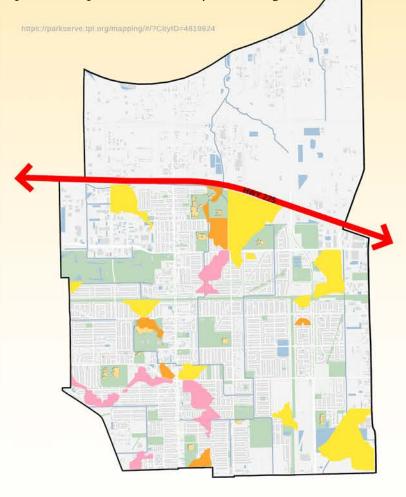

A more balanced and accessible green infrastructure will not only enrich the quality of life for residents but also reinforce Deer Park's commitment to sustainable urban living. As the city continues to grow, thoughtful planning and strategic enhancements to the Green Space Network will play a pivotal role in fostering a resilient, vibrant, and interconnected community.

GREEN SPACE NETWORK LEGEND

PRIORITY AREAS FOR NEW PARKS

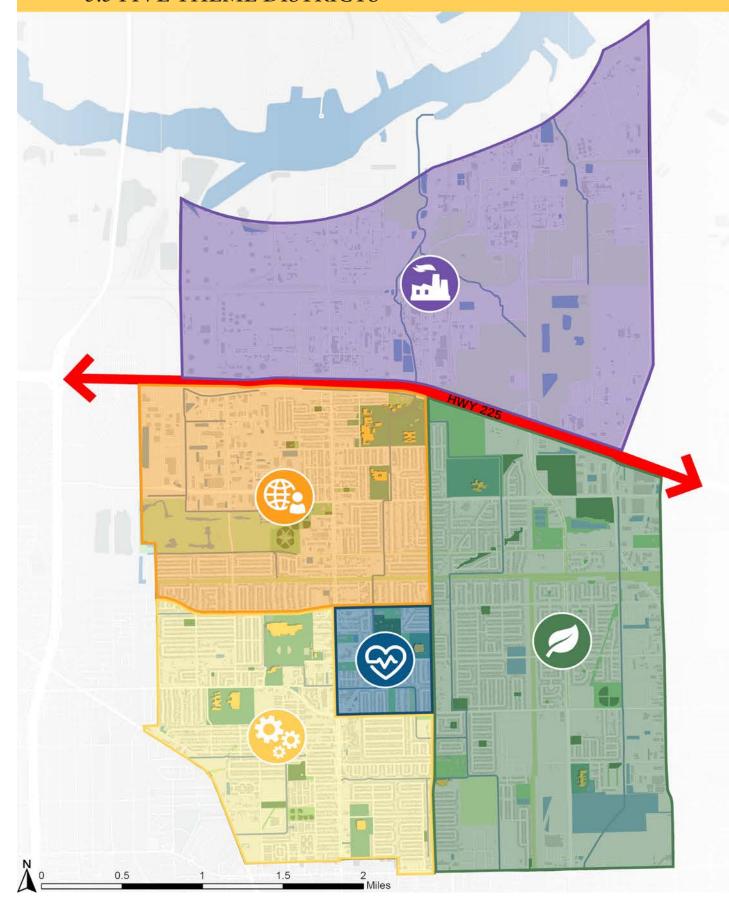

Utilizing ParkServe data for Deer Park, areas in need of a park system intervention are categorized into very high priority, high priority, and moderate priority. This classification is determined by factors such as population density, density of low-income households, density of people of color, air pollution respiratory hazard, urban heat islands, and health, emphasizing the importance of ensuring that all residents are within a 10-minute walk to a park for improved community well-being.

PRIORITY AREAS LEGEND

5.3 FIVE THEME DISTRICTS

INDUSTRIAL DISTRICT

The industrial district is a dynamic and vital part of a city, contributing significantly to its economic growth while posing unique challenges related to infrastructure, environment, and community planning.

AREA ~ 4.6 SQUARE **MILES**

PARKS

0

CULTURAL-ARTS DISTRICT

Through a seamless blend of the past and present, the district endeavors to amplify the significance of its heritage, offering both visitors and residents an immersive experience that honors and celebrates the unique history that defines this charming community.

NATURE DISTRICT

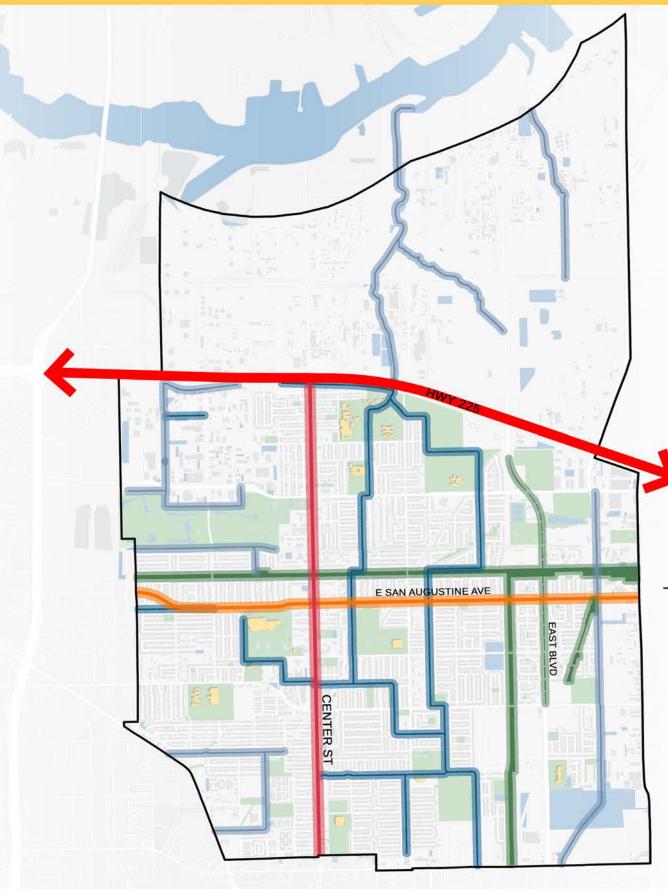

The Nature District initiative in Deer Park underscores the pivotal role of nature in enhancing the city's fabric. By introducing a greener landscape, the initiative not only elevates the quality of life for residents but also cultivates a sustainable image for Deer Park in comparison to neighboring communities.

AREA ~ 4.4 **SQUARE** MILES

PARKS

24 (7 HOA PARKS)

5.4 CHARACTERISTIC AND FUNCTIONAL CORRIDORS

THE VITAL ROLE OF CORRIDORS

In Deer Park, corridors serve as vital connectors, forming a foundational link between different areas of the city. The three distinct corridor types—drainage canal corridors, streethuman corridors, and open green space corridors—share the common objective of fostering connectivity.

Drainage canal corridors play a crucial role by linking green open spaces to the Buffalo Bayou channel, effectively managing storm water within the city. Street-human corridors seamlessly weave together places of interest, ranging from local businesses and parks to residential homes, creating a comprehensive network that enhances accessibility and community engagement. Additionally, open green space corridors contribute to the synergy of the green network, serving as interconnected pathways for both humans and wildlife.

These corridors hold significance in the city's overall analysis as integral components of the green network systems and the broader connectivity infrastructure. Their vertical and horizontal alignment throughout Deer Park not only ensures efficient storm water management but also enhances the overall accessibility and interconnectedness of the city, promoting a harmonious balance between urban development and natural elements.

CORRIDOR LEGEND

TYPES OF CORRIDORS

Deer Park features a diverse array of corridors, including Concrete vs. Green drainage canals, Civic vs. Commercial corridors, and green open space corridors. Each corridor type plays a vital role in the seamless interconnection of the city—facilitating the efficient movement of storm water, linking people to various destinations, and connecting green spaces for both aesthetic and environmental benefits.

5.5 COMMUNITY AMENITIES AND HUBS

COMMUNITY DYNAMICS

The community amenities in Deer Park are primarily concentrated along the Center Street corridor and the western side of the city. This alignment is closely tied to Center Street's role as the main commercial thoroughfare. Historical markers, divided into Texas and Deer Park categories, are centrally located at the intersection of Center Street and East 13th Street. Preserving these markers is vital for upholding Deer Park's cultural heritage and unique identity.

Furthermore, strategic placement of daycares and senior living facilities is essential to inform intergenerational design programming. Identifying suitable areas accessible to both the youth and senior community ensures a thoughtful and inclusive approach to community planning. By pinpointing these facilities, we can foster a sense of community cohesion and facilitate interactions between different age groups, enriching the overall community experience.

IMPORTANCE OF COMMUNITY AMENITIES

Community amenities are vital contributors to the overall quality of life for residents, playing a pivotal role in fostering the well-being of a community. Community amenities collectively shape a community into a multifaceted and thriving environment. Beyond meeting basic needs, these amenities contribute to a community's identity, social cohesion, and the overall happiness and satisfaction of its residents, creating a space that people are proud to call home.

6.17.2 PROPOSED DALMATIAN PARK- MASTER PLAN

6.17.3 PROPOSED DALMATIAN PARK - PERSPECTIVES AND CONCEPT FOR SCULPTURES

VII. RECOMMENDED IMPLEMENTATION STRATEGIES

VII. Implementation Strategies

Successful implementation of park and recreation master plan mainly depends on the following four factors:

- 1) Effective phase development plan and strategies
- 2) Availability of funding sources
- 3) Active community engagement and strong public support
- 4) Effective marketing and promotion efforts

Here are recommended strategies to consider for each of those four aspects:

7.1. Recommendations for Phase Development Strategies

This comprehensive master plan develops a long-term plan for the next ten years (2024-2034) that outline overall goals, strategies, and priorities for park development and recreational programs in the city of Deer Park. It should be carried out incrementally. Therefore, it is important to allocate resources efficiently based on community needs and strategic goals.

When developing a park and recreation area, phasing the project strategically can help manage resources, reduce risk, and ensure the project meets the evolving needs of the community. By breaking the project into phases, the city can manage the development more effectively.

It is suggested to establish a priority list of projects based on the community need assessment and funding availability, as well as the level of project impact. The high priority should be given to those projects that will serve those currently underserved population groups and neighborhoods, that will be relatively easy to get funded, and that will produce high impact on the branding, marketability, and promotion of the city.

As the community development is a dynamic process, the master plan should be flexible as well. Therefore, the priority list should be revisited and updated yearly to reflect changes of the influencing factors. It should include one-year priority, three priority and five-year priority.

7.2. Recommendations for Project Funding Strategies

Funding for park and recreation facilities and services can come from a variety of sources. In general, common funding sources for a city's parks and recreation facilities and services include the following:

 Local Taxes: Property taxes, sales taxes, and other local taxes are often a primary source of funding for Parks and Recreation Departments. These taxes generate revenue that can be allocated to support parks, recreational facilities, and programs.

- Operating Budget: The city's annual operating budget allocates a portion of its general funds to the Parks and Recreation Department to cover ongoing operational expenses.
- Federal, State and Local Grants: Federal, state, and local grants can provide additional
 funding for specific projects, initiatives, or capital improvements. These grants may be
 competitive and awarded based on the department's proposals and needs. Depending on
 eligibility and availability, a community may receive grants from federal and state
 agencies for specific projects or programs, such as environmental initiatives or youth
 development.
- **User Fees:** User fees for activities, facilities, and programs offered by the Parks and Recreation Department can provide a significant portion of the funding. These fees may include charges for sports leagues, classes, facility rentals, and more.
- Donations and Sponsorships: Private donations from individuals, businesses, and community organizations can support parks and recreation programs and facilities.
 Sponsorship agreements with local businesses may also provide financial support in exchange for advertising or naming rights.
- Partnerships: Public-private partnerships can also be a source of funding. These
 partnerships may provide sharing costs and responsibilities for specific projects or
 programs with private organizations.
- **Fundraising and Events:** The Parks and Recreation Department may organize fundraising events and campaigns to generate additional revenue. Events such as community festivals, charity runs, or sports tournaments can raise funds.
- Bond Issues: Cities may issue bonds to fund major capital projects related to parks and recreational facilities. Residents vote on these bonds, which are typically repaid over time through local taxes.
- **Special Districts:** In some cases, a city may create special taxing districts specifically dedicated to funding parks and creation. The revenue generated from these districts can be used exclusively for parks and recreational purposes.

In the past, the source of funding for the park and recreation faculties in Deer Park mostly came from the combination of city's tax revenue and annual budget, federal and state grants, and revenue generated from the park and recreation program and user fees. To implement those projects suggested in this comprehensive master plan, more funding sources are needed. Therefore, it is important to develop an innovative and integrated funding strategy for the park and recreation development and improvement. Effective funding strategies often involve a combination of approaches to ensure sustainability and support for both capital projects and ongoing operations.

7.2.1. Apply for Various Grants

The City of Deer Park should gear up its efforts to seek various grants from federal and state government and from private foundations or non-profit organizations.

- Consult with Public Financing Experts: Consult with a professional public financing
 and funding expert to identify potential and target funding sources, including federal and
 state grant programs, non-profit organization, and foundations, to develop a funding
 application plan and schedule.
- Government Grants: Apply for federal, state, and local grants specifically designated for park development, conservation, and recreational programs (e.g., Land and Water Conservation Fund).
- **Private and Non-Profit Grants**: Seek grants from foundations and non-profits that support community development, environmental conservation, and recreational activities (e.g., the National Recreation and Park Association).

7.2.2 Partnerships and Collaboration

The City of Deer Park should continue to seek partnerships and collaboration with various sectors, such as:

- Local Businesses and Corporate Sponsorships: Partner with local businesses for financial support in exchange for advertising opportunities or naming rights for facilities, and for sponsorships, donations, or collaborative events.
- Joint Ventures: Enter partnerships with private companies to co-develop or manage park facilities. These can include naming rights agreements or profit-sharing arrangements.
- **Concessions**: Allow private operators to run food, retail, or recreational services within the park, providing a revenue stream while reducing operational burdens.
- **Local Schools**: Develop a partnership with local school district to jointly develop school/neighborhood parks, educational/recreational/fitness programs.
- Community Organizations: Collaborate with local community groups and non-profit
 organizations for joint funding and program support and to co-host events, programs, or
 improvement projects.
- Government Agencies: Work with state and federal agencies for funding and regulatory support.

7.2.3 Donations and Fundraising

To promote and encourage individual donations (both in cash and in -kind contribution or donated time) and volunteerism to get residents participate in park and recreation project construction, maintenance, operation, and organization.

- **Individual Donations**: Create a donor program or "Friends of the Park" organization to solicit contributions from community members.
- Material Donations: Solicit donations of materials or supplies from local businesses and construction companies.

- Volunteer Labor: Leverage volunteer efforts for park maintenance, landscaping, and program delivery, reducing labor costs.
- Fundraising Events: Engage the community through fun and interactive activities.
- Online Campaigns: Use crowdfunding platforms to raise money for specific projects or needs. Promote these campaigns through social media and local media.
- **Community Drives**: Run targeted campaigns within the community for specific improvements or new facilities.

7.2.4 User Fees and Rentals

- Revenue-generating Facilities and Programs: To increase revenue-generated
 facilities, programs, events and activities in the parks and recreational facilities, such as
 rentable indoor and outdoor wedding venues, picnic pavilions, amphitheater for outdoor
 art performance/concerts, art exhibitions, after-school educational and recreational
 programs/classes, senior adult fitness classes, etc.
- Program Fees: Implement reasonable fees for participation in recreational programs and classes. Consider sliding scale fees to ensure accessibility for all income levels.
- Facility Rentals: Charge fees for the rental of park facilities, such as sports fields, event spaces, or pavilions.

By utilizing a mix of these strategies, the city can build a robust funding model that supports both the initial development and ongoing maintenance of park and recreation facilities.

7.3. Recommendations for Community Engagement

When community members are involved, they are more likely to use, support, and advocate for park facilities and programs. Engaging the community effectively is crucial for the success of park and recreation programs. It is critical to actively engage with the community through newsletters, public meetings, and interactive platforms to keep them informed and involved. The following strategies are suggested to foster community engagement:

7.3.1. Engagement Through Community Leaders and Influencers

- Engage Influencers and Ambassadors: Identify, engage, and support community
 influencers and local ambassadors to promote park programs and events within their
 networks. Collaborate with local community leaders, influencers, and respected figures
 to advocate for park and recreation initiatives and boost visibility.
- City Park Commission: Continue to work with the existing Park Commission as an advisory board to receive their ongoing input and feedback on park and recreation services.
- Youth and Senior Committees: Form specialized committees to represent the interests of different age groups and ensure their needs are addressed.

7.3.2 Engagement Through Partnerships and Collaboration

- Local Businesses: Partner with local businesses to sponsor events or support community programs, fostering a sense of joint ownership.
- **Schools and Local Organizations**: Collaborate with schools, clubs, non-profit organizations, and community groups to reach potential users and promote programs.

7.3.3 Engagement Through Surveys and Feedback Mechanism -

- Community Surveys: Regularly conduct surveys to gather feedback from residents to understand their needs, interests, and preferences. Conduct regular assessments of park facilities and programs to identify areas for improvement.
- Diverse Feedback Channels: Offer multiple ways for users to provide feedback and engage with the park and recreation services, including online forms, suggestion boxes, and direct contact options.
- Personalized Communication: Use data and feedback to personalize communication and target specific groups with tailored messages and offers.
- Regular Updates: Keep the community informed about park projects, upcoming events, and maintenance schedules through newsletters, websites, and social media.
- Continuous Improvement: Use feedback to continuously improve programs, facilities, and engagement efforts to better serve the community.

7.3.4. Engagement Through Technology

- Online Surveys and Feedback Forms: Use digital surveys to reach a broad audience
 and gather quantitative data on community preferences and needs. Provide an easy way
 for residents to submit feedback online about their park experiences or suggestions for
 improvements.
- **Data Collection**: Use data analytics to monitor usage patterns, evaluate program effectiveness, and make informed decisions.
- Social Media Campaigns: Use platforms like Facebook, Instagram, and Twitter to share updates, promote events, and solicit feedback.
- Mobile Apps: Develop or us existing mobile apps for event and program registration, park information, and user feedback.
- **Interactive Maps**: Provide interactive maps of park facilities and trails on your website and app to enhance visitor experience.

7.3.5. Engagement Through Events, Educational Programs and. Volunteerism

• **Community Events**: Organize events like festivals, farmers' markets, or movie nights in the park to draw people in and encourage social interaction.

- Classes: Offer programs on topics such as environmental stewardship, fitness, and gardening to engage community members in meaningful activities.
- **School Programs**: Collaborate with schools to incorporate park-related activities and educational programs into the curriculum.
- **Workshops**: Conduct interactive workshops where residents can contribute ideas, vote on options, and discuss potential projects.
- Public Meetings: Host open forums and town hall meetings to gather input on park design, program needs, and priorities.
- Volunteer Opportunities: Create opportunities for community members to volunteer in park maintenance, event organization, and program facilitation. Host volunteer days for park clean-ups, planting, or maintenance, giving residents a hands-on role in improving their community.

7.3.6 Inclusive Engagement Through Diverse Outreach

It is important to ensure that engagement efforts reach all community segments, including underrepresented groups, by using multiple languages, accessible formats, and various outreach methods.

- Accessibility: Design events and facilities to be accessible to people of all abilities and ensure that engagement opportunities are inclusive.
- Diverse Cultural Events: Celebrate diverse cultures and traditions through events, festivals, and programs that reflect the community's cultural makeup.
- Social Inclusion: Design programs that cater to various social groups and address
 different community needs and interests. Organize focus groups with diverse segments
 of the community to deeper insights into specific issues or ideas.
- **Demographic data:** Use demographic data to tailor facilities and programs to various age groups, abilities, and cultural backgrounds.
- **Eco-Friendly Initiatives**: Highlight any sustainability practices and green initiatives in the marketing efforts to attract environmentally conscious users.
- Online Ads: Use targeted online advertising through platforms like Google Ads or Facebook Ads to reach specific demographics interested in recreation and outdoor activities.

Engaged communities are more likely to participate in, sustain, and advocate for local parks and recreational activities. By implementing the above strategies, the city of Deer Park can build a strong connection with the community, ensuring that park and recreation facilities meet their needs and gain their support.

It is important to monitor and regularly assess the effectiveness of engagement strategies and adjust based on feedback and participation rates.

7.4 Branding, Marketing, Outreach and Promotion

Effective marketing strategies can significantly boost awareness, participation, and support for park and recreation facilities and programs. By employing a mix of the following comprehensive marketing strategies, the City of Deer Park can effectively raise awareness and enhance the visibility and impact of your park and recreation facilities and programs.

7.4.1 Brand Development

- Create a Strong Brand Identity: Develop a recognizable logo, slogan, and consistent
 messaging that reflects the values and mission of the park and recreation services of
 Deer Park. For instance, "toward a greener, healthier and happier community" may be
 used as slogan to reflect the values and mission of the park and recreation services of
 Deer Park.
- Unified Signage System: Design and implement a unified signage and way-finding system for all parks and recreation facilities in Deer Park.
- Visual Consistency: Ensure that all marketing materials, from signage to digital content, maintain a cohesive visual identity.

7.4.2 Digital Marketing and Data Analytics

- Website: Maintain an up-to-date, user-friendly website with information on parks, recreational facilities, programs, events, and online registration.
- **Social media**: Utilize platforms like Facebook, Instagram, Twitter, and TikTok to promote events, share updates, and engage with the community.
- **Email Marketing**: Send regular newsletters with information on upcoming events, program highlights, and community news.
- Data-Based Marketing: Monitor the effectiveness of the marketing efforts using analytics
 tools to track website traffic, social media engagement, and program participation. Then
 use data insights to adjust the marketing efforts.

7.4.3 Content Marketing

- Blogging: Write articles on topics related to outdoor activities, health and wellness, park conservation, and community events to engage and inform the community.
- Videos: Create promotional videos showcasing park amenities, events, and user testimonials. Share these on social media and your website.
- **Photo Galleries**: Post high-quality photos of park activities, special events, and beautiful park scenery to attract interest and showcase what's available.
- Educational Content: Share information about conservation efforts, sustainability practices, and how the community can get involved.

 Celebrating Successes: Share success stories and milestones related to park projects, program achievements, or community impact.

7.4.4 Community Outreach Events and Promotions

- Local Advertising: Work with local newspapers, magazines, radio stations, and TV
 channels to feature stories, press releases to keep residents informed of significant park
 improvements, new programs, or notable events.
- Flyers and Posters: Distribute flyers and posters in high-traffic areas like community centers, libraries, schools, and local businesses.
- Open Houses: Host open house events to introduce new facilities, programs, or improvements to the community.
- **Special Offers**: Provide promotions such as discounted registration fees, free trial classes, or special events to attract new participants.
- Media Kits: Provide media kits with information about the park and recreation services, including high-resolution images and key statistics.
- **Promotion**: Use social media, local media, and community bulletin boards to promote events and programs.

By incorporating all the above implementation strategies, the city of Deer Park can create a vibrant, inclusive, and well-maintained park and recreation system that meets the needs of the community and enhances the quality of life. Implementation of this new parks and recreation master plan can significantly enhance community well-being, environmental health, and local economies, and make the City of Deer Park become a greener, healthier, and happier community.

APPENDIX A. COMMUNITY NEEDS SURVEY QUESTIONNAIRE

Section I. Your Visit to Parks and Recreation Facilities

1. The following questions are about your visits to <u>local park/recreation facilities</u>. These questions help us understand how they are currently being used and gather residents' concerns and suggestions about them.

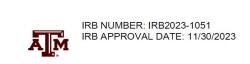

For any facilities, if you answer "N" for the question "Visited before", please skip the rest of the questions in the same row.

Parks/recreation facilities	Wisits 1	II - C	Justine Stille TOW.
