**Date:** February 19, 2026

**To:** City of Deer Park Planning & Zoning Commission / Board of Adjustment  
**Attn:** Planning Department  
**Ref:** Variance Request for Permit #RB-002001-2025  
**RE: Request for Variance from the 15' Building Line Requirement**

To the Members of the Board of Adjustment,

Please accept this letter as a formal request for a variance regarding the property located at **2617 Horseshoe Bend**. I am requesting a variance from the **15' Building Line ordinance** to allow for the construction of a permanent patio cover that will extend past the established setback.

**Description of Request:** The proposed project consists of an open-sided patio cover designed to provide shade and protection for the existing rear concrete area. To achieve the necessary functional depth for the structure, the roofline is proposed to encroach 7.6 feet beyond the 15' building line.

**Justification of Hardship:** Literal enforcement of the 15' building line at this specific location creates an unnecessary hardship due to the following circumstances:

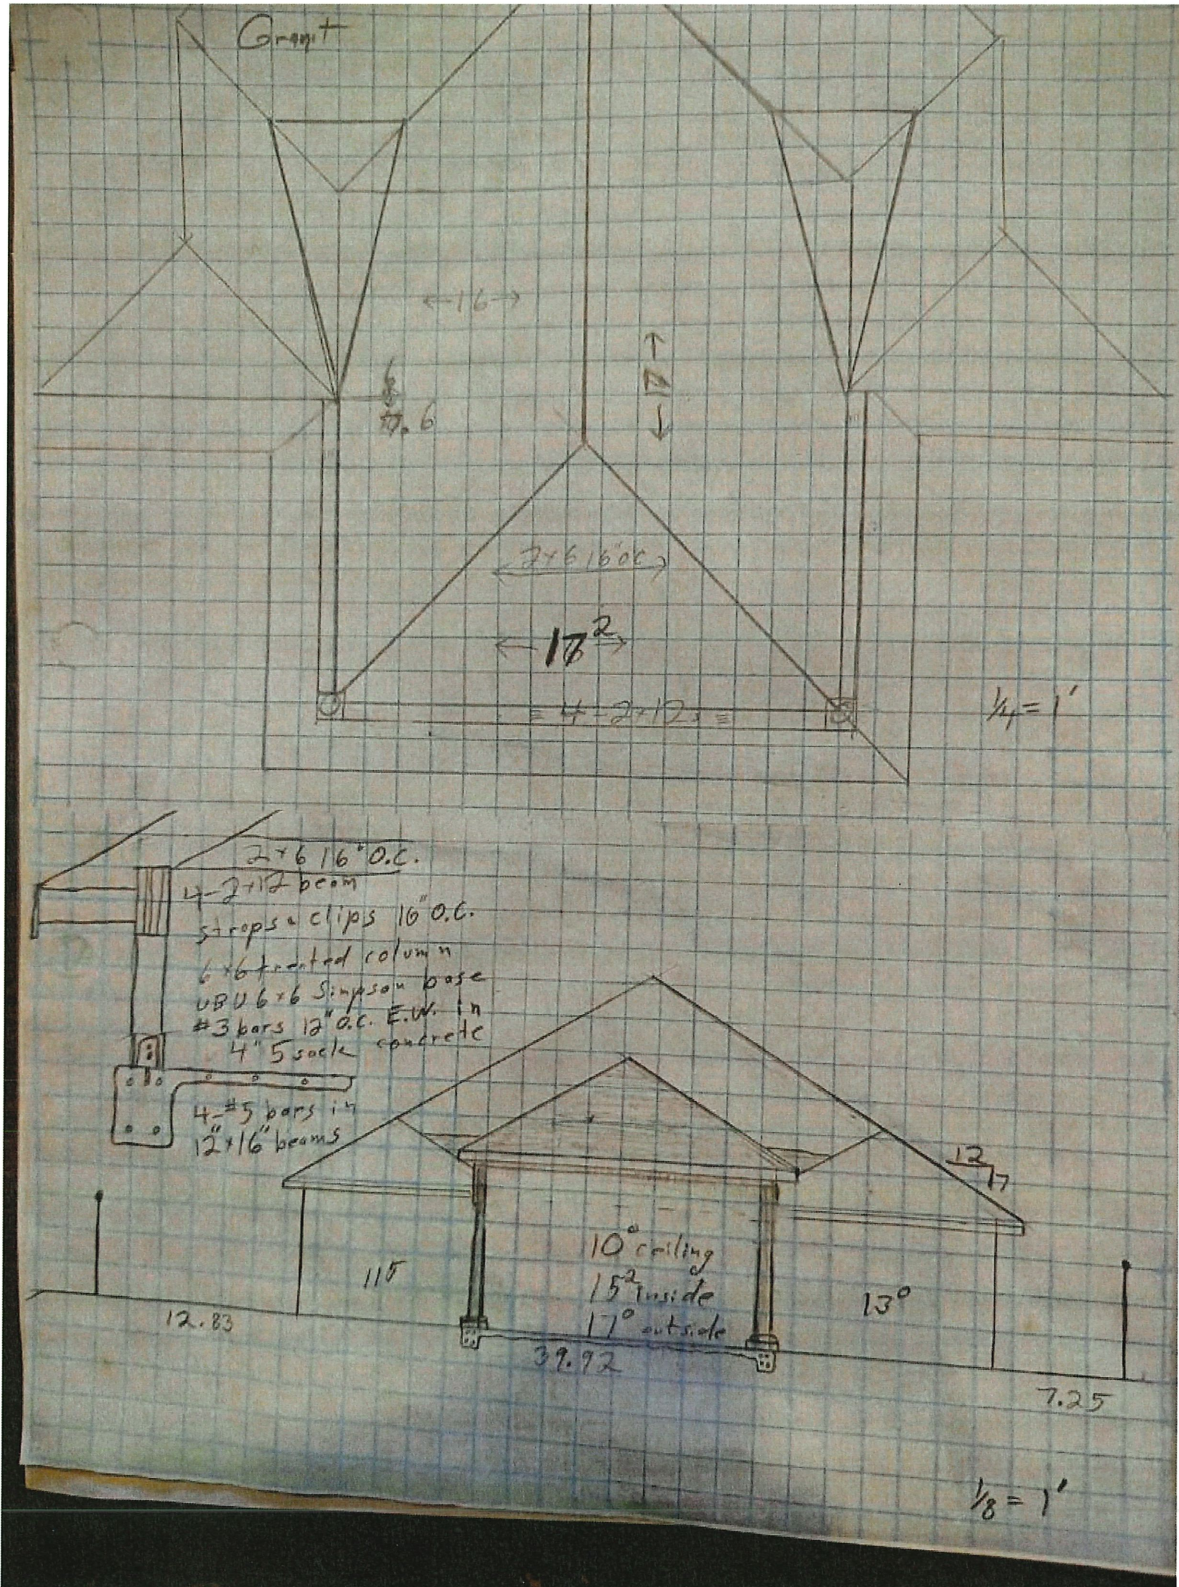

- **Restrictive Buildable Area:** Due to the small size and unique configuration of this backyard, the buildable area is significantly more restricted than standard rectangular lots within the same zoning district. This makes it impossible to construct a functional shade structure while remaining entirely behind the 15' line.
- **Existing Utility Easements:** There are existing underground utility easements located on the opposite side of the house which strictly prevent construction in other areas of the lot. This leaves the requested building line encroachment as the only viable and safe location for the proposed patio cover.
- **Preservation of Property Rights:** Several adjacent properties within this subdivision feature similar patio covers that extend to or past the building line. Granting this variance would provide me with the same property rights and reasonable enjoyment of outdoor space currently enjoyed by my neighboring residents.
- **Minimal Public Impact:** The proposed structure is designed to be architecturally consistent with the primary residence. As an open-sided cover, it will not obstruct the views, light, or air circulation of adjacent properties, nor will it interfere with any city drainage or utility access.

I, or my designated representative, will be present at the scheduled public hearing to answer any further questions the Commission may have. Thank you for your time and consideration of this request.

Sincerely,

**Lisa P Vera**
