

Construction material
being dumped from
large trailer.

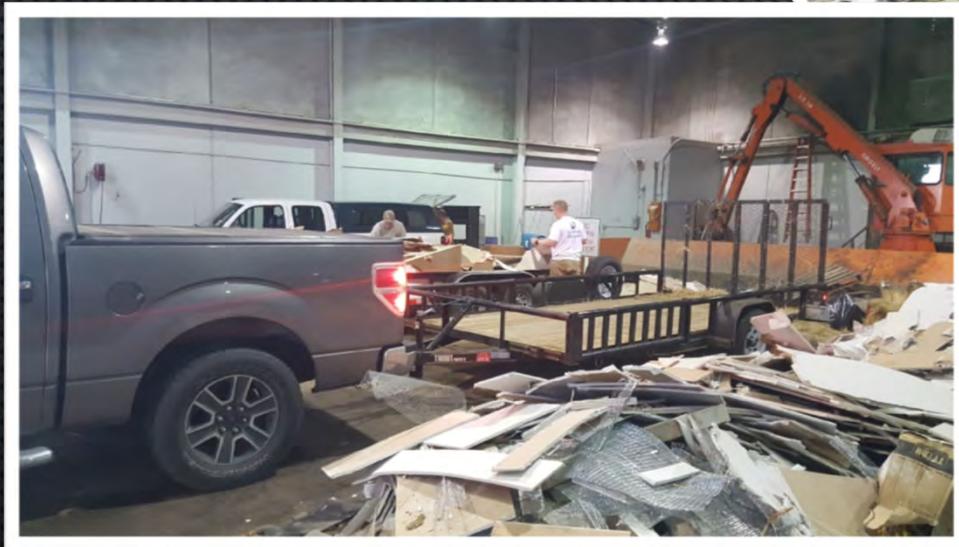

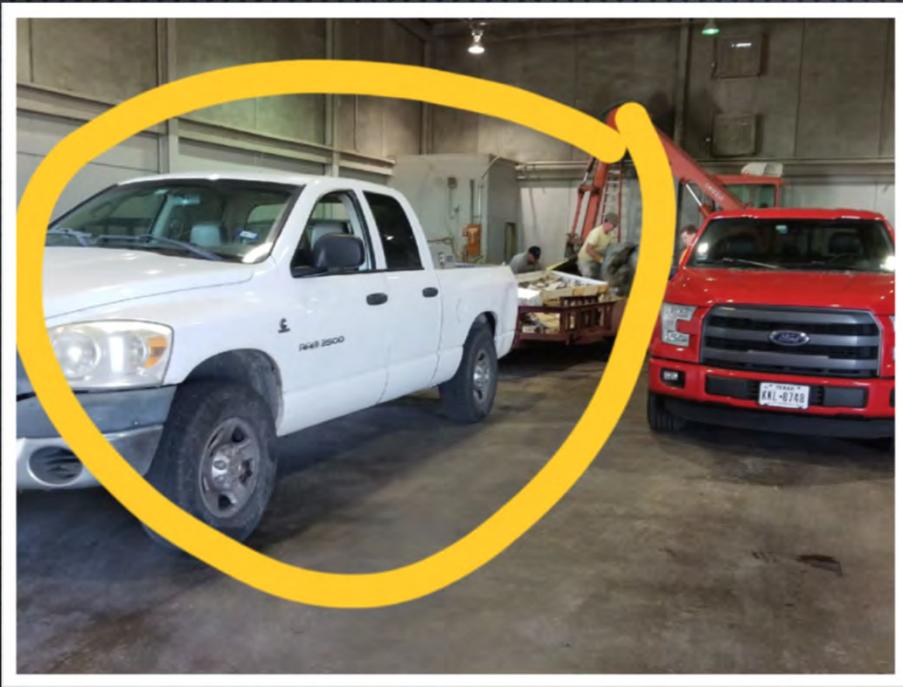

This gentleman comes in
every Saturday to dump
construction debris

Clearly this is a commercial dump bed trailer

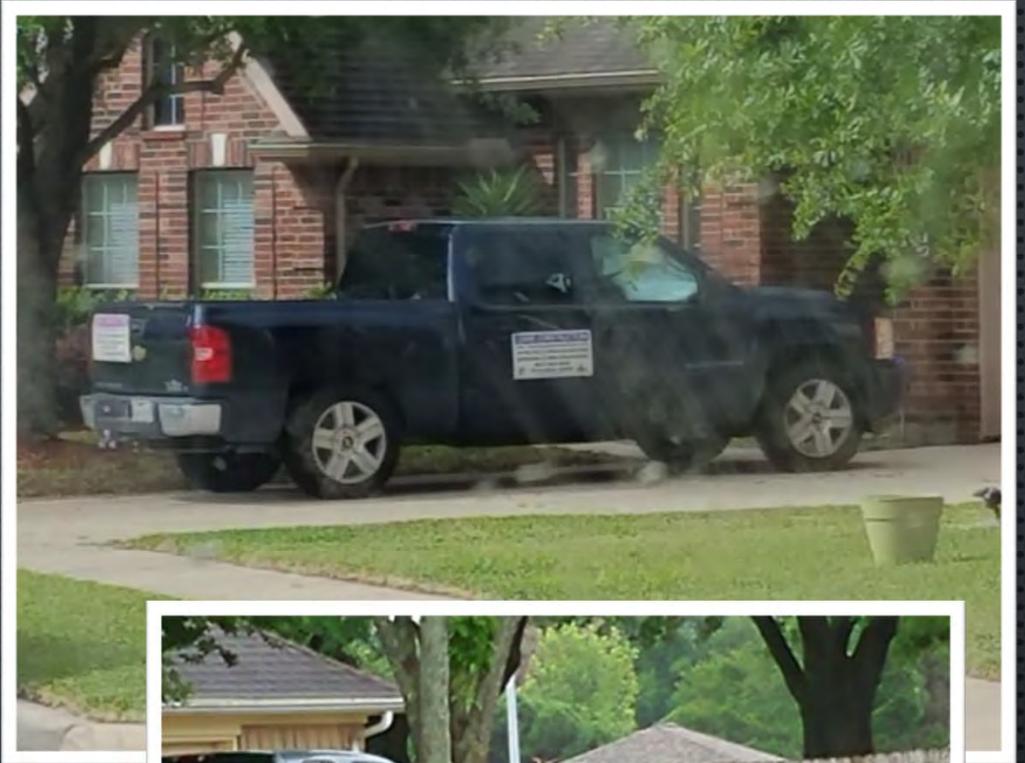

You can clearly see the amount of construction debris that is being brought in from just one trailer.

Two frequent patrons

A frequent patron lives at this address. You can see the trailers are already loaded with construction debris, waiting to be dumped Saturday.

Another frequent patron doesn't even reside in Deer Park but is able to show identification saying he does.
