

2016-2017 Approved Projects

- Continue with Phase 2 of Station 1 remodel by removing paneling, sheetrock replacement as needed, painting and refurbish ladies restroom.
- Purchase and installation of a slide out tray for the bed of the safety officer's response vehicle.
- Purchase an outboard motor for the inflatable rescue boat.
- Replace the generator at Station 2.
- Replacement of L-22 (1996 Pierce 65 foot ladder truck).
- Replace damaged panels and hardware to the fire department "burn building".
- Continue to replace PPE (bunker gear) as needed for firefighters, EMS personnel and new recruits.
- Perform annual SCBA inspections and testing, fire hose testing, ladder testing and hydraulic tool testing.
- Expand concrete pad behind new ambulance bay for additional parking.
- Refurbish an existing ambulance with a new chassis and update the patient module.
- Purchase of a response duty vehicle for EMS duty officers and responders (to include radios, emergency lighting, graphics, etc.).
- Upgrade ambulance stretchers with "Steer-Lock" feature and "XPS Retro Kits" for wide body patients.
- Purchase a remote control, animated vehicle for fire prevention activities.
