Ordinance #

We would like to build a protégé carport to extend to the end of our home. Our house and garage is built in an L shape position, with the garage set back from the road (please see attached photos). To extend the carport to the end of the house will require a variance. The current regulation allows for 20-foot carports and ours plans would require a 30-foot carport (please see attached site plans).

We are building the carport to not only cover and protect our current automobiles and motorhome, but to enable us to enter our home covered when the weather is bad. At this time we are forced to park the motorhome on the street, to enter the home, load and unload the vehicles and get the kids in through the garage. The 30-foot extension will allow the motorhome and 90% of my husband's Toyota Matrix to be protected from the elements.

While parking the motorhome on the street in front of the home is not against any parking laws or city ordinances, but has caused some difficulties for our neighbors. The motorhome is large and difficult for people exiting the Kitty street to see oncoming traffic going down Luella. Since we are also located right next to the City Public Works Department it causes an issue for the city trucks to exit the facility as well.

We are respectfully asking the commission to accept and approve our request for a variance to extend our carport from the 20-foot regulation to the 30-foot we are requesting.

Thank you for consideration in the matter,

Adam Curtice
