Consideration of and action on approving a reimbursement to the City of Deer Park for the \$4,000.00 value of the City's ambulance chassis, which is being used as a trade-in for remounting and refurbishing an ambulance module.

Summary:

The FY 2016-2017 budget includes the refurbishment of one ambulance. As part of the refurbishment, the District plans to trade-in the existing chassis. The existing chassis is owned by the City of Deer Park, so the trade-in allowance of \$4,000.00 is owed to the City for the value of the asset. A budget amendment will be presented to cover this amount owed to the City (along with the additional cost needed to complete the refurbishment of the ambulance).

Fiscal/Budgetary Impact:

\$4,000.00 reimbursement will be paid to the City of Deer Park.

Approve the reimbursement to the City of Deer Park for the \$4,000.00 value of the City's ambulance chassis, which is being used as a trade-in for remounting and refurbishing an ambulance module.
