Discussion of issues relating to Phase I of the Wayfinding Program.

Summary: Phase I of the Deer Park Wayfinding program began in 2016. Phase I of the project included 4 monument signs and 15 wayfinding signs constructed at various Parks and City owned right of ways around Deer Park. The signs were originally installed in 2017, however shortly after installation it was discovered that the wayfinding signs were not constructed to specifications listed in the construction documents. The contractor, National Sign Plaza, warrantied the signs and over time completed all necessary repairs for Phase I signs. The attached document shows pictures of the signs in addition to a breakdown of locations and funding.

Fiscal/Budgetary Impact:

None

No action at this time.
